Suicide Century Andrew Bennett,2017-10-05 Suicide Century investigates suicide as a prominent theme in twentieth century and contemporary literature Andrew Bennett argues that with the waning of religious and legal prohibitions on suicide in the eighteenth and nineteenth centuries and the increasing influence of medical and sociological accounts of its causes and significance in the twentieth century literature responds to the act and idea as an increasingly normalised but incessantly baffling phenomenon Discussing works by a number of major authors from the long twentieth century the book explores the way that suicide makes and unmakes subjects assumes and disrupts meaning induces and resists empathy and insists on and makes inconceivable our understanding of ourselves and of others

Imitation in Human and Animal Behavior Wanda Wyrwicka,2018-01-16 Imitation is an often observed form of behavior that is beginning to attract widespread attention on the part of a variety of researchers Imitative acts of newborn babies and development of imitation skills in later life have been discussed in a variety of scientific studies but the large amount of observational and experimental data has been widely dispersed There is a need for a synthetic study in which the results of this research can be analyzed and the neural mechanisms of imitation can be explored and established Imitation in Human and Animal Behavior fulfills this need This book presents an overview of a number of studies on imitative behavior of humans and animals concentrating on selected cases of imitative behavior The early chapters discuss the results of studies on humans from ages of about one hour to three years of age and older It has been shown for example that newborn babies under one hour old are already able to imitate simple facial gestures There is a chapter devoted to the role of imitation in the cognitive development of children and adolescents describing also the use of imitation as a method in the therapy of phobias Finally there is a section that concentrates on imitation related to the tragic social problem of suicide among adolescents and adults including up to date statistical and clinical data The second half of the book focuses on the data obtained in studies on feeding among animals including examples of interspecies imitation Newly hatched chicks for instance imitate their mother in selection of grain color this is also true when the mother is replaced with an arrow shaped object resembling a pecking beak Included are observations on learning by imitation in rats cats and monkeys offering some data related to learning by following the leader The book also describes cases of inhibition of imitation in both humans and animals including a clinical case in which imitative behavior was disrupted after surgery on prefrontal lobes of the brain Imitation in Human and Animal Behavior is solidly rooted in observational and experimental data discussing the possible neural mechanisms underlying imitative behavior A hypothetical brain mechanism responsible for imitative behavior is proposed Imitation in Human and Animal Behavior will be fascinating and enlightening reading for psychologists neuroscientists pediatricians as well as nonprofessionals interested in behavior and development

Longings eminent cultural theorist Mary Louise Pratt posits that the last decade of the twentieth century and the first decades of the twenty first mark a turning point in the human and planetary condition Examining the forces of modernity neoliberalism coloniality and indigeneity in their pre and postmillennial forms Pratt reflects on the crisis of futurity that accompanies the millennial turn in relation to environmental disaster and to the new forms of thinking it has catalyzed She turns to 1990s Latin American vernacular culture literary fiction and social movements which simultaneously registered neoliberalism s devastating effects and pursued alternate ways of knowing and living Tracing the workings of colonialism alongside the history of anticolonial struggles and Indigenous mobilizations in the Americas Pratt analyzes indigeneity both as a key index of coloniality neoliberal extraction and ecological destruction and as a source for alternative modes of thought and being Ultimately Pratt demonstrates that the changes on either side of the millennium have catalyzed new forms of world making and knowledge making in the face of an unknowable and catastrophic future **Beyond the Human-Animal**
