Animals As Persons Essays On The Abolition Of Animal Exploitation

**Anne Peters, Jérôme de
Hemptinne, Robert Kolb**

Animals As Persons Essays On The Abolition Of Animal Exploitation:

Animals as Persons Gary Lawrence Francione, 2008 Gary L. Francione explains our historical and contemporary attitudes about animals by distinguishing the issue of animal use from that of animal treatment. He then presents a theory of animal rights that focuses on the need to accord all sentient nonhumans the right not to be treated as property. *The War Against Nonhuman Animals* Stacy Banwell, 2023-05-09 We are currently engaged in an existential species war against nonhuman animals. This book argues that during this war nonhuman animals should be granted legal personhood and treated as protected persons rather than the property of protected persons. The main argument is that War Crimes and Crimes against Humanity, rape, forced pregnancy, and other acts of sexual violence are being committed within the meat, egg, and dairy industries. Avoiding dreaded comparisons, the book explores shared sources of oppression between human and nonhuman animals who are subject to the expressions and consequences of reproductive violence. It asks what drives and facilitates the war against nonhuman animals and what are the global consequences of this war. Throughout, it demonstrates how racism, sexism, and speciesism inform both intrahuman violence and the violence of the animal industrial complex. Ultimately, the book asks us to reconsider what it means to be human. *Animals in the International Law of Armed Conflict* Anne Peters, Jérôme de Hemptinne, Robert Kolb, 2022-10-06 Animals are the unknown victims of armed conflicts. Wildlife populations usually decline during warfare with disastrous repercussions on the food chain, on fragile ecosystems, and on precarious habitats. Belligerents take advantage of the chaos of war for poaching and trafficking of animal products. Livestock, companion, and zoo animals, highly dependent on human care, are direct victims of hostilities. The book is the first legal analysis of these issues. It maps the framework of international humanitarian law, examining which and how the concepts, principles, and rationales can be applied and adapted for a better protection of animals. The contributions inter alia discuss precautions for animal civilians, problems of animal combatants and prisoners, a specific status for veterinarian personnel, the recognition of biodiversity hotspots as specially protected zones, and the potential of enforcement mechanisms. The concluding chapter draws together novel interpretations and reform proposals. **Science, Gender and the Exploitation of Animals in Britain Since 1945** Catherine Duxbury, 2021-09-30 This book offers an historical analysis of the culture of animal-dependent science in Britain from 1945 to the present, exploring key areas of animal experimentation such as warfare, medical science, and law from a gendered perspective. Questioning the nature of knowledge production in this area and how animal experimentation intersects with broader cultural norms and values concerning sex and gender, it examines the impact of contemporary forms of capitalism on animal-dependent science, its historical trajectory, and gendered configuration. With close attention to the broad social context from the creation of the Welfare State and the loss of Empire to the emergence of neoliberalism in the 1980s and its present-day omnipotent manifestation, the author asks how animal experimentation and the use of nonhuman animals in specific areas of science is gendered and has implications for women. Drawing on a variety of

sociological philosophical feminist and historical theories and engaging with a wealth of primary and secondary materials of scientific research of the time Science Gender and the Exploitation of Animals in Britain Since 1945 contends that there is a persistent gendered ideology of animal use which remains inscribed within the policies of the British neoliberal state As such it will appeal to scholars of sociology history and philosophy with interests in gender and the treatment of nonhuman animals

Animals as Legal Beings Maneesha Deckha,2020-12-16 In *Animals as Legal Beings* Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness *Animals as Legal Beings* seeks to bring critical animal theorizations and animal law closer together Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented *Animals as Legal Beings* makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy

The Oxford Handbook of Animal Studies Linda Kalof,2017 The Oxford Handbook of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

Teaching the Animal , Encyclopedia of Business and Professional Ethics Deborah C Poff,Alex C. Michalos,2023-05-24 This encyclopedia edited by the past editors and founder of the Journal of Business Ethics is the only reference work dedicated entirely to business and professional ethics Containing over 2000 entries this multi volume major research reference work provides a broad based disciplinary and interdisciplinary approach to all of the key topics in the field The encyclopedia draws on three interdisciplinary and over lapping fields business ethics professional ethics and applied ethics although the main focus is on business ethics The breadth of scope of this work draws upon the expertise of human and social scientists as well as that of professionals and scientists in varying fields This work has come to fruition by making use of the expert academic input from the extraordinarily rich population of current and past editorial board members and section editors of and contributors to the Journal of Business Ethics

Navigating the Jungle Steven C. Tauber,2015-08-27 For much of our history legal scholars focused predominantly on the law s implications for human beings while ignoring how the law influences animal welfare

Since the 1970s however there has been a steep increase in animal advocates use of the courts Animal law has blossomed into a vibrant academic discipline with a rich literature that examines how the law affects animal welfare and the ability of humans to advocate on behalf of nonhuman animals But most animal law literature tends to be doctrinally based or normative There has been little empirical study of the outcomes of animal law cases and there has been very little attention paid to the political influences of these outcomes This book fills the gap in animal law literature This is the first empirically based analysis of animal law that emphasizes the political forces that shape animal law outcomes
