Animal Death Of A Poacher:

Animal Antony E. Green, 2015-10-19 A poacher operating in Northern Kenya out of Sudan tracks a lone bull elephant the biggest seen one in a generation The specific goal is killing it and removing his enormous tusks When the elephant turns the tables on the poacher and rampages through the poacher's camp killing his son a chain of events is unleashed The bloodlust slaughter of hundreds of animals the attempted murder of a conservationist the murder of his wife and the soldiers sent to rescue them is the beginning For fourteen years the poacher sought the elephant the Devil Beast and the conservationist sought the poacher And then comes the cyber expert who changes everything far more than he ever set out to do *Feeling*

Animal Death, 2019-06-20 The emotional exchange between so called humans and more than human creatures is an overlooked phenomenon in societies characterized by the ubiquitous deaths of animals This text offers examples of people across diverse disciplines and perspectives from biomedical research to black theology to art learning and performing emotions expanding their desires discovering new ways to behave and altering their sense of self purpose and community because of passionate but not romanticized attachments to animals By articulating the emotional ties that bind them to specific animals lives and deaths these authors play host to creaturely ghosts who reorient their world vision and work in the world offering examples of affect and feeling needed to enliven multi species ethics **Art Historical Perspectives on the**

Portrayal of Animal Death Roni Grén, 2024-04-22 This study concentrates on the discourses around animal death in arts and the ways they changed over time Chapter topics span from religious symbolism to natural history cabinets from hunting laws to animal rights from economic history to formalist views on art In other words the book asks why artists have represented animal death in visual culture maintaining that the practice has through the whole era been a crucial part of the understanding of our relation to the world and our identity as humans This is the first truly integrative book length examination of the depiction of dead animals in Western art The book will be of interest to scholars working in art history animal studies and cultural history *The Buck that Buries its Poo* Quinton Coetzee, 2023-05-29 Is a zebra black with white stripes or white with black stripes And why do flamingos stand on one leg while bats hang upside down Did you know that a chameleon's tongue can shoot out at five times the acceleration of a fighter jet In *The Buck That Buries its Poo* naturalist Quinton Coetzee answers these and many other intriguing wildlife questions He also dispels countless myths and elucidates some of the legends that surround creatures in the South African bush we thought we knew all about For example bats do not get tangled in people's hair because they are far too adept at flying and elephants are not afraid of mice but they do fear bees Other tall tales you might hear around the campfire are that lions roll in animal dung entrails or carcasses to disguise their scent and that rhinos have a predilection for stamping out fires What is true though is that hyenas are more closely related to cats than to dogs This handy guide is based on Coetzee's own research and that of others and his experience gleaned over decades living close to nature and wildlife It seeks to unravel the mysteries of nature in Africa from mammals

and birds to arthropods and plants with fascinating information and fun trivia It is a book that will enlighten and entertain PS Zebras are black with white stripes *Run, Rhino, Run* Esmond Bradley Martin, Chryssee Martin, 1982 *The Speaker*, 1899 **Animal Kingdom**, 1980 **Horn of Darkness** Carol Cunningham, Joel Berger, 2000 The black rhino is nature's tank feared by all animals Even lions will break off a hunt to detour around one And yet the black rhino is on the edge of extinction its numbers dwindling from 100 000 at the turn of the century to less than 2 500 today The reason is that in places like Yemen China Korea Taiwan and Thailand the rhino's horn is more valuable than gold so valuable that people will risk their lives to harvest it To deter rhino poachers African governments have spent millions on helicopters paramilitary operations fences and guard dogs even relocation to protected areas Finally Namibia decided to dehorn its rhino population in a last ditch effort to stop the slaughter In 1991 Carol Cunningham and Joel Berger and their eighteen month old daughter Sonja went to Namibia to weigh the effects of dehorning on rhinos In *Horn of Darkness* they tell the story of three years in the Namib Desert studying Africa's last sizable population of free roaming black rhinos This is the closest most readers will come to experiencing life in the remaining wilds of Africa Cunningham and Berger writing native chapters capture what it is like to leave the comforts of civilization to camp for months at a time in a land filled with deadly predators to study an animal that is reclusive unpredictable and highly dangerous The authors describe staking out water holes in the dead of the night creeping to within twenty seven meters of rhinos to photograph them all the while keeping a lookout for hyenas elephants and lions They recount many heart pounding escapes one rhino forces Carol Cunningham up a tree an unseen lion in hot pursuit of hyenas races right past a frozen Joel Berger and capture the adrenaline rush of inching closer to a rhino that might flee or charge at any moment They also give readers a clear sense of the careful patient work involved in studying animals the frustration of long days without finding rhinos or seeing other people coping with heat and thirst the Namib desert is one of the driest on Earth with dirt and insects driving hundreds of kilometers in a Land Rover packed to capacity slowing amassing records on one hundred individual rhinos over the course of several years And perhaps most important the authors reveal that the data they collected suggests that the dehorning project might backfire that in the four years after dehorning began calf survival was down the evidence suggests that hyenas might be preying on calves and the hornless mothers couldn't defend their offspring They also describe the dark side of scientific work from the petty jealousy of other scientists outside researchers were often seen as ecological imperialists to the controversy that erupted after the authors published their findings as furious officials of the Namibian conservation program denounced their findings and through delays and other tactics effectively withheld a permit to allow the couple to continue their study Weaving together the historical accounts of other naturalists a vividly detailed look at life in the wild and a behind the scenes glimpse of scientific work and the dark side of the conservation movement *Horn of Darkness* is destined to be a classic work on the natural world **Rhino Road** Martin Booth, 1992 **Actual Ethics** James R. Otteson, 2006-06-19 *Actual Ethics* offers a moral defense of the classical liberal

political tradition and applies it to several of today's vexing moral and political issues. James Otteson argues that a Kantian conception of personhood and an Aristotelian conception of judgment are compatible and even complementary. He shows why they are morally attractive and perhaps most controversially when combined they imply a limited classical liberal political state. Otteson then addresses several contemporary problems: wealth and poverty, public education, animal welfare, and affirmative action, and shows how each can be plausibly addressed within the Kantian, Aristotelian, and classical liberal framework. Written in clear, engaging, and jargon-free prose, *Actual Ethics* will give students and general audiences an overview of a powerful and rich moral and political tradition that they might not otherwise consider.
