Animate Earth Science Intuition And Gaia:

Animate Earth Stephan Harding, 2006 Originally published United Kingdom Green Books Ltd 2006 **Animate Earth** Stephan Harding, 2009 This book argues that we need to establish a relationship with the planet as a living entity in which we are indissolubly embedded and to which we are all accountable **The Systems View of Life** Fritjof Capra, Pier Luigi Luisi, 2014-04-10 Over the past thirty years a new systemic conception of life has emerged at the forefront of science New emphasis has been given to complexity networks and patterns of organisation leading to a novel kind of systemic thinking This volume integrates the ideas models and theories underlying the systems view of life into a single coherent framework Taking a broad sweep through history and across scientific disciplines the authors examine the appearance of key concepts such as autopoiesis dissipative structures social networks and a systemic understanding of evolution The implications of the systems view of life for health care management and our global ecological and economic crises are also discussed Written primarily for undergraduates it is also essential reading for graduate students and researchers interested in understanding the new systemic conception of life and its implications for a broad range of professions from economics and politics to medicine psychology and law **Ecological Democracy** Odin Lysaker, 2023-12-01 Ecological Democracy offers an original thought provoking and engaging treatment of why and how democracy should be re imagined in reaction to today's ecological crisis The book explains that one need to re imagine both the view on nature and democratic ideals within the same framework in the Anthropocene the present geological epoch of human made instability in the Earth system and its planetary boundaries This book proposes unique and challenging readings of green political theory and its development of ecological democracy in the last four decades The book is the first to offer a systematic and detailed interpretation of the role of critical theory vis vis green political theory through an update regarding current non anthropocentric critical theorists and how they may contribute to the further development of ecological democracy Ecological Democracy builds further on deep ecology ecophenomenology and animism by articulating an ecocentric view on nature which defends an intrinsic moral value of all existence as well as formulating the democratic principle of all ecologically affected parties This book provides a sophisticated convincing and accessible argument for how to re imagine ecological democracy as ecocentrism in practice ecological love To love ecologically means caring for and encountering all existence on the Earth and in the cosmos This book is multi disciplinary and will be of great value to researchers as well as undergraduate and postgraduate students from many disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **The ^AOxford Handbook of Improvisation in Dance** Vida L. Midgelow, 2019-02-21 This handbook offers new arguments about the ways that dance improvisation informs understandings of history socio cultural conditions lived experience and technologies *Sustainability Principles and Practice* Margaret Robertson, 2021-02-09 Sustainability Principles and Practice gives an accessible and

comprehensive overview of the interdisciplinary field of sustainability The focus is on furnishing solutions and equipping students with both conceptual understanding and technical skills Each chapter explores one aspect of the field first introducing concepts and presenting issues then supplying tools for working toward solutions Elements of sustainability are examined piece by piece and coverage ranges over ecosystems social equity environmental justice food energy product life cycles cities and more Techniques for management and measurement as well as case studies from around the world are provided The 3rd edition includes greater coverage of resilience and systems thinking an update on the Anthropocene as a formal geological epoch the latest research from the IPCC and a greater focus on diversity and social equity together with new details such as sustainable consumption textiles recycling microplastics and net zero concepts The coverage in this edition has been expanded to include issues solutions and new case studies from around the world including Europe Asia and the Global South Chapters include further reading and discussion questions The book is supported by a companion website with online links annotated bibliography glossary white papers and additional case studies together with projects research problems and group activities all of which focus on real world problem solving of sustainability issues This textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught
