Animating Space Animating Space:

Animating Space J.P. Telotte, 2010-08-01 Animators work within a strictly defined limited space that requires difficult artistic decisions The blank frame presents a dilemma for all animators and the decision of what to include and leave out raises important questions about artistry authorship and cultural influence In *Animating Space* From Mickey to WALL E renowned scholar J P Telotte explores how animation has confronted the blank template and how responses to that confrontation have changed Focusing on American animation Telotte tracks the development of animation in line with changing cultural attitudes toward space and examines innovations that elevated the medium from a novelty to a fully realized art form From Winsor McCay and the Fleischer brothers to the Walt Disney Company Warner Bros and Pixar Studios *Animating Space* explores the contributions of those who invented animation those who refined it and those who in the current digital age are using it to redefine the very possibilities of cinema

The Animation Studies Reader Nichola Dobson, Annabelle Honess Roe, Amy Ratelle, Caroline Ruddell, 2018-10-18 The *Animation Studies Reader* brings together both key writings within animation studies and new material in emerging areas of the field The collection provides readers with seminal texts that ground animation studies within the contexts of theory and aesthetics form and genre and issues of representation The first section collates key readings on animation theory on how we might conceptualise animation and on some of the fundamental qualities of animation New material is also introduced in this section specifically addressing questions raised by the nature style and materiality of animation The second section outlines some of the main forms that animation takes which includes discussions of genre Although this section cannot be exhaustive the material chosen is particularly useful as it provides samples of analysis that can illuminate some of the issues the first section of the book raises The third section focuses on issues of representation and how the medium of animation might have an impact on how bodies gender sexuality race and ethnicity are represented These representations can only be read through an understanding of the questions that the first two sections of the book raise we can only decode these representations if we take into account form and genre and theoretical conceptualisations such as visual pleasure spectacle the uncanny realism etc

A Reader in Animation Studies Jayne Pilling, 1998-05-22 Cartoons both from the classic Hollywood era and from more contemporary feature films and television series offer a rich field for detailed investigation and analysis Contributors draw on theories and methodology from film television and media studies art history and criticism and feminism and gender studies
