Ankylosing Spondylitis The Facts The Facts Series:

Ankylosing Spondylitis and Axial Spondyloarthritis Muhammad Asim Khan, 2023 Ankylosing spondylitis AS currently grouped under the term axial spondyloarthritis axSpA is a chronic form of arthritis that causes inflammation of the spine and other joints This book provides clear and practical information on symptoms diagnosis treatments and daily life with AS for patients and their families

Ankylosing Spondylitis: The Facts Muhammad Asim Khan, 2002-07-11 Ankylosing spondylitis is a chronic form of arthritis known to affect around 1 in 200 people over 1 million sufferers in the USA alone No cure has yet been found for the disease however early diagnosis and proper medical management can be important in reducing the risk of disability and deformity Ankylosing spondylitis the facts is the first mass market book to be published on this important disease It provides clear and accessible information on treatment diagnosis genetic counselling and daily life with this illness Professor Khan is one of the leading experts in the world on AS while also suffering from it This combination of scientific knowledge and personal experience of a debilitating disorder results in a unique book which will prove invaluable for sufferers wishing to know more about their condition and those that share their lives

The 101 Most Unusual Diseases and Disorders Evelyn B. Kelly, 2015-11-23 This book explores serious diseases and disorders that most readers have never heard of ranging from genetic infectious and environmental diseases to autoimmune idiopathic and mental disorders Despite centuries of scientific study and medical research there are still many human diseases and disorders that remain difficult to manage or are incurable Some of these maladies are extremely rare yet together they affect a substantial number of people The 101 Most Unusual Diseases and Disorders examines seldom seen illnesses providing high school and college students with an excellent resource for research as well as supplying fascinating reading for general readers interested in diseases and medical science This book provides clear easy to understand and scientifically grounded information on the vast number of unusual medical conditions that have been recorded covering five kinds of diseases and disorders genetic infectious environmental mental and other which constitutes diseases of autoimmune and unknown origin Examples of the medical conditions addressed include autoimmune encephalitis Ebola kleptomania Morgellons syndrome orthorexia pneumoconiosis and Prader Willi syndrome Selected case studies enable readers to better empathize with the experiences of those who have these disorders and how these afflictions have affected their lives

Myotonic Dystrophy Peter S. Harper, 2002 Myotonic dystrophy is part of the group of muscular dystrophies It is the commonest inherited muscular dystrophy and has a profound effect on individuals who are diagnosed with the disease and their families It is present for many depths of a patient's life and has many attendant implications Associated problems with other organs of the body for example which does not occur in the other dystrophies making this very distinctive disorder and very troubling one for those close to it This book covers a wide range of aspects of the disease and explains in simple terms exactly what the condition is what the symptoms are and how they can or might develop Also discussed is how to present them or spot them

early enough to treat them and so limit any potential debilitation Routes for further study are gone into as it is not claimed that the book is exhaustive it does not for example cover the very rarest manifestations of the illness Self education is encouraged and this book gives anyone interested the tools with which to find out more and empower themselves by taking an active role in their own treatment Most importantly it carries the message that there is hope something can be done even if there is as yet no actual cure Any patient who has left a diagnostic consultation with the impression that there is nothing to be done will find this a great source of hope and strength There are few clinicians more experienced in this field than Peter Harper who has studied and written extensively on the subject
