A Practical Guide:

A Practical Guide To The Conduct Of Field Research In The Social Sciences Elliot J. Feldman, 1981

Playwriting Noël Greig, 2005 Playwriting offers a practical guide to the creation of text for live performance. It contains a wealth of exercises for amateur and professional playwrights. Usable in a range of contexts, the book works as a step by step guide to the creation of an individual play, a handy resource for a teacher or workshop leader, a stimulus for the group devised play. The result of Noël Greig's thirty years experience as a playwright, actor, director and teacher, Playwriting is the ideal handbook for anyone who engages with playwriting and is ultimately concerned with creating a story and bringing it to life on the stage.

Exhibits and Displays Carol Ng-He, Patti Gibbons, 2021-04-13 Exhibits and displays are booming and in demand at all types of libraries. From simple displays of books to full scale museum quality exhibitions, library exhibits can highlight collections that surprise visitors, tell stories and engage audiences in innovative ways. Often exhibits feature more than books, showcasing art, photographs, archival materials, multimedia elements as well as hands on activities. Stepping outside traditional walls, digital exhibits reach audiences beyond the circulation desk and pave another way for libraries to share information, promote resources and even lead change in the community. Despite the growing interest, most library and information science LIS programs do not include exhibit development courses. It is not uncommon for librarians to learn exhibit production on the job or through resources in the museum sector. Wearing many hats, librarians absorb exhibit work as part of community outreach initiatives or take on exhibit duties as a general professional interest in the emerging field. Exhibits Displays is a practical how to guide that helps librarians unleash their library's potential to engage and wow visitors. The guide explains how to kick start and grow an exhibit program through expert advice, insights from professional literature and winning case studies that cover exhibition development from conceptual planning through de installation, packing and evaluation. Exhibits Displays: A Practical Guide for Librarians covers Pre planning, Curation and content development, Project management, Graphic design and writing for readability, Preservation and collection care, Legal considerations and loan registration, Installation, de installation and maintenance tips, Hands on interactives and digital exhibits, Educational programming, Marketing, Audience evaluation, Supplemental examples and case studies. Librarians in academic, public school and special libraries will benefit from Exhibits Displays: A Practical Guide for Librarians. The book is also an excellent textbook for LIS courses covering exhibition development and outreach.
