

Content, Key Terms and Essential Questions

Describe the system of the Aral Sea in terms of inputs, outputs, and size.

What happens to matter? What about energy?
Thermodynamics state? How does this relate to the Earth system?

Thermodynamics state? How does this relate to the Earth system?

Thermodynamics, not all of the energy from the gasoline you put in your car goes forward. What happens to the rest?

Describe the system of the Aral Sea in terms of inputs, outputs, and size.

What happens to matter? What about energy?

Thermodynamics state? How does this relate to the Earth system?

Thermodynamics, not all of the energy from the gasoline you put in your car goes forward. What happens to the rest?

Describe the system of the Aral Sea in terms of inputs, outputs, and size.

Pollutant (Examples)	Source(s)	Problem(s)
BOD:	- Decomposition of dead organic matter - Includes agriculture (30%) combined sewer system	- Creates a dead zone - Killing fish and decreases DO
Fecal Coliforms (E. coli)	Waste from mammals and birds, agricultural storm runoff (feedlots) and human sewage	Disease, the level of harm depends on the type of fecal coliform
Crude Oil:	Tankers, offshore drillings, etc.	- Volatile evaporates → air pollution and toxic - Coat the feathers of birds so they can't fly - Coat the fur of mammals - Hard "crust" on the surface of the water - Not eaten by fish and birds - Tankers can't be cleaned - Continue to pollute the water

Environmental Science

UNIT 1 Topics, Content, Key Terms and Essential Questions

Topic	Policies
Clean Water Act (1977)	- Regulates the discharge of pollutants into waters - Unlawful to discharge pollutants into surface waters without a permit - Regulates quality standards for surface waters - Shift over time from a source-oriented and pollutant-by-pollutant focus to a watershed focus
Safe Drinking Water Act (1974)	Establishes standards for public drinking water
Clean Air Act (1970)	Authorized the development of comprehensive federal and state regulations to limit emissions from both stationary (industrial) sources and mobile sources
Acid Deposition Act (1980)	- Acid Deposition: limits maximum SO₂ emissions from coal-fired power plants (cap-and-trade system for SO₂ emissions permits) - Also limits NO_x, toxics, CFCs and other chlorine chemicals - More stringent emission controls on cars and requirements for cleaner burning fuels to reduce urban smog
Clean Air Act Amendments (1990)	- Regulates CO, NO₂, O₃, Pb, PMs and SO₂ - Tougher standards for ozone and PM to help children and elderly who are most susceptible to air pollution
Clean Water Act (1977)	Design, operation & monitoring of sanitary landfills

Environmental Systems

Describe what happened to the system of the Aral Sea in terms of its inputs, outputs, and size.

The Aral Sea is used to be the fourth largest sea on the planet and people used to grow rice and cotton and it wasn't very efficient irrigation. Then in 2014, it became a desert.

What happened to the water to the sea? It was evaporated. The water was used for irrigation.

What type of system is Earth with respect to matter? What about energy? Earth is a closed system (it is the atom that makes up) and it is conserved on earth. It is an open system.

What does the First Law of Thermodynamics state? How does this relate to the Earth system? "Energy cannot be created or destroyed, it can only change form or be transferred to another system." The Earth system is a closed system with respect to matter, but it is an open system with respect to energy. The energy it gets from the sun is used to create oxygen.

What does the Second Law of Thermodynamics state? How does this relate to the Earth system? The second law of thermodynamics states that you cannot break even, it is changed from one form to another, it always moves from a more useful form to a less useful form.

Based on the second law of thermodynamics, not all of the energy in a car gets used to move the car forward. What happens to the rest? The rest can be good for air conditioning, and charging your phone.

Using a systems analysis approach (inputs vs. outputs), describe why global warming is occurring. Inputs (global warming) are absorbing and killing the carbons that maintain temperate heating (output) is occurring.

How does negative feedback affect the steady state of a system? What is negative feedback? A negative feedback is self-regulating and stabilizing because the output

Environmental Science Student Workbook for Use with Withgott & Laposata's Environment David Tamm, 2021-02-23 Barron's 5 Steps and the others are great resources for reviewing at the end of the year but this Tamm's Textbook Tools workbook accompanies students all year long. It is filled with assignments that follow the regular textbook chapter by chapter page by page. It gets students to read the book. It can also be used as a review since it is an ongoing notebook of the entire curriculum. All you need is the Miller Spoolman textbook either physical or online. Teachers can copy at will and parents can use it as a student consumable. The rationale for having this workbook now is that publishers are putting so much of their extras online that traditional paper classwork can be left lacking. But now no matter if the textbook itself is written in ink or electrons, serious students will find this a valuable way to write in and keep notes for themselves like generating a portfolio. The activities in this workbook challenge students to apply the concepts, think of real examples, diagram every chapter, and think through things with the authors. It has been updated with examples relating to Covid and the Biden Administration's environmental policy positions. Find TTT Tamm's Textbook Tools on FB or click the author name at the top of this page for the other 40 titles in this series. **AP Environmental Science** Gary S. Thorpe, 2020-02-04 Always study with the most up to date prep. Look for AP Environmental Science ISBN 9781506262062 on sale August 04, 2020.
