Analytics and Intuition in the Process of Selecting Talent Jürgen Deters,2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical

and intuitive emotional selection procedures are successfully integrated by practitioners ECMLG 2018 14th European Conference on Management, Leadership and Governance Dr. Ing. Benny M.E. de Waal, Prof. dr. Pascal Ravesteijn, 2018-10-18

Big Data and Learning Analytics in Higher Education Ben Kei Daniel, 2016-08-27 This book focuses on the uses of big data in the context of higher education The book describes a wide range of administrative and operational data gathering processes aimed at assessing institutional performance and progress in order to predict future performance and identifies potential issues related to academic programming research teaching and learning Big data refers to data which is fundamentally too big and complex and moves too fast for the processing capacity of conventional database systems The value of big data is the ability to identify useful data and turn it into useable information by identifying patterns and deviations from patterns
