## Adaptation Book 1 Volume 1:

**Adaptations** Deborah Cartmell, Imelda Whelehan, 2022 Adaptations Critical and Primary Sources is a three volume reference resource that brings together over 80 landmark texts in adaptation studies Volume One covers the history of adaptation studies by plotting the prehistory of the field beginning with Vachel Lindsay's classic *Art of the Moving Picture* 1915 through Virginia Woolf's classic essay on *The Cinema* through to some of the most important critical and theoretical interventions up until the 1990s when the area really emerges as a critical force in the academy Volume Two collects essays from the last 25 years showing how the scholarly legacy laid out in Volume One still has a profound impact on adaptation studies today while charting the process of critical and theoretical maturation This volume shows how adaptations studies has outgrown its contested place in the gap of film and literary studies and how its interventions transcend disciplinary perspectives across the arts and humanities Volume Three covers key case studies such as Christine Geraghty's take on adapting Westerns Ian Inglis understanding of the transformation of music into movies and Eckart Voigts concept on Jane Austen and participatory culture 0 With topics ranging from the limitations of the novel to adapting stage to screen contributions from a wide range of international scholars film critics and novelists combine to make Adaptations Critical and Primary Sources an original overview of critical debates today Cartmell and Whelehan introduce each excerpt and offer a critical overview of the collected work the rationale for its inclusion and suggestions for further reading

*The Adaptation Industry* Simone Murray, 2012-03-12 Adaptation constitutes the driving force of contemporary culture with stories adapted across an array of media formats However adaptation studies has been concerned almost exclusively with textual analysis in particular with compare and contrast studies of individual novel and film pairings This has left almost completely unexamined crucial questions of how adaptations come to be made what are the industries with the greatest stake in making them and who the decision makers are in the adaptation process The Adaptation Industry re imagines adaptation not as an abstract process but as a material industry It presents the adaptation industry as a cultural economy of six interlocking institutions stakeholders and decision makers all engaged in the actual business of adapting texts authors agents publishers book prize committees scriptwriters and screen producers and distributors Through trading in intellectual property rights to cultural works these six nodal points in the adaptation network are tightly interlinked with success for one party potentially auguring for success in other spheres But marked rivalries between these institutional forces also exist with competition characterizing every aspect of the adaptation process This book constructs an overdue sociology of contemporary literary adaptation never losing sight of the material and institutional dimensions of this powerful process
