Tumor Dormancy, Quiescence, and Senescence, Volume 2 M.A. Hayat, 2013-11-29 In this second volume in the series exploring Tumor Dormancy Quiescence and Cellular Senescence discussion is focused on the role of tumor dormancy in diseases such as breast cancer melanoma prostate cancer liver cancer and lung cancer M A Hayat the series editor writes in the preface that little is known of factors regulating the transition of residual cancer into a dormant state or the subsequent reinitiation of growth A majority of us he says have in situ tumors that may remain dormant or may progress into a lethal form of cancer the former are prevented from recruiting their own blood supply Section I covers Molecular Mechanisms with chapters on the role of NAE inhibitor MLN4924 oncogene induced senescence the role played by mitogen activated protein kinase in the induction of cellular senescence mechanisms of premature cell senescence and other topics Section II examines Tumor and Cancer discussing defects in chromatin structure and diseases the role of fibrosis in tumor progression and the dormant to proliferative switch the function of ING proteins in cancer and senescence and more The final section is devoted to Stem Cells and Cancer Stem Cells featuring chapters showing that senescent derived pluripotent stem cells are able to redifferentiate into fully rejuvenated cells that the transcription factor Gata2 regulates quiescence in haematopoietic stem and progenitor cells and discussing dormancy and recurrence of cancer stem cells in bone The contributors point out that the quiescent state regulates hematopoietic stem cells and muscle stem cells and detail the role of kinase in the mediation of reversible quiescent state in a subset of ovarian pancreatic and colon cancers Molecular mechanisms underlying stress induced cellular senescence and accumulation of reactive oxygen species and induction of premature senescence are also presented Discussion includes the important role of microRNAs in oxidative stress induced apoptosis and senescence and the effect of microRNA as a modulator of cell proliferation in lung cancer The book includes an explanation of the suppression of cellular senescence in glioblastoma brain tumor Taking a broad and varied perspective this volume was written by 70 contributors representing 11 countries

Encyclopedia of Cancer Manfred Schwab, 2011-10-14 The merging of different basic and clinical science disciplines towards the common goal of fighting against cancer has long ago called for the establishment of a comprehensive reference source both as a tool to close the language gap between clinical and basic science investigators and as a platform of information for students and informed laymen alike The Encyclopedia of Cancer provides rapid access to focused information on all topics of cancer research for clinicians research scientists and advanced students Given the overwhelming success of the Second Edition which appeared in 2009 and fast recent development in the different fields of cancer research it has been decided to publish a third fully revised and expanded edition following the principal concept of the first edition that has proven so successful Recent developments are seeing a dynamic progress in basic and clinical cancer science with translational research increasingly becoming a new paradigm in cancer research In particular new approaches to both Personalized Cancer Medicine and Targeted Therapies have made promising progress While the Second Edition featured scholarly contributions from approximately 1 000 scientists clinicians in four Volumes the Third Edition includes 1 300

contributors in 7 Volumes with an A Z format of approx 7000 entries It provides definitions of common acronyms and short definitions of related terms and processes in the form of keyword entries In addition there are detailed essays which provide comprehensive information on syndromes genes and molecules and processes and methods Each essay is well structured with extensive cross referencing between all entries In the Third Edition topical Essays present a comprehensive picture of major cancers such as Breast Cancer Colorectal Cancer Prostate Cancer Ovarian Cancer Renal Cancer Lung Cancer and Hematological Malignancies Leukemias and Lymphomas For each of these cancers different authoritative Essays are included that cover topics ranging from Pathology to Clinical Oncology and Targeted Therapies This new feature should meet the expectance that a wide community has towards a major cancer reference works The Encyclopedia of Cancer will be accessible both in print and online and this information source should be of value to both the clinical and basic scientific community as well as to the public
