The set presents the latest research on current issues in Human Factors and Ergonomics. It draws from an international panel that examines cross-cultural differences, design issues, usability, road and rail transportation, aviation, modeling and simulation, and healthcare.

Digital Humanities and the Cyberspace Decade, 1990-2001 Claire Warwick, 2024-10-03. Setting out a history of cyberspace and its relationship with the discipline that was to become digital humanities, this book is an account of an often forgotten period of internet history in the 1990s when this medium was in its infancy. It provides a detailed account of the concepts of cyberspace and the virtual which were characteristic of a perception that using the internet allowed users to enter a separate space from everyday life, a world elsewhere. In doing so, it argues that this libertarian idea of the internet framed it as a new frontier where the rules of the everyday world did not and should not apply, and where the individual could find freedom. These early norms and the regrettable lack of regulation that was a consequence of them, this book argues, contributed to many of current issues with internet media, including toxic communication, disinformation, and over-commercialisation.

iPhone iOS4 Development Essentials - Xcode 4 Edition Neil Smyth, 2014-12. **The Mobile Frontier** Rachel Hinman, 2012-06-11. Mobile user experience is a new frontier. Untethered from a keyboard and mouse, this rich design space is lush with opportunity to invent new and more human ways for people to interact with information. Invention requires casting off many anchors and conventions inherited from the last 50 years of computer science and traditional design, and jumping head first into a new and unfamiliar design space.
