Maliska,2023-01-19 This book presents the developments of the finite volume method applied to fluid flows starting from the foundations of the method and reaching the latest approaches using unstructured grids It helps students learn progressively creating a strong background on CFD The text is divided into two parts The first one is about the basic concepts of the finite volume method while the second one presents the formulation of the finite volume method for any kind of domain discretization In the first part of the text for the sake of simplicity the developments are done using the Cartesian coordinate system without prejudice to the complete understanding The second part extends this knowledge to curvilinear and unstructured grids As such the book contains material for introductory courses on CFD for under and graduate students as well as for more advanced students and researchers **Computational Fluid Dynamics** Paul D. Bates,Stuart N. Lane,Robert I. Ferguson,2005-08-05 Uniquely outlines CFD theory in a manner relevant to environmental applications This book addresses the basic topics in CFD modelling in a thematic manner to provided the necessary theoretical background as well as providing global cases studies showing how CFD models can be used in practice demonstrating how good practice can be achieved with reference to both established and new applications First book to apply CFD to the environmental sciences Written at a level suitable for non mathematicians **Tsunamis and Hurricanes**

Ferdinand Cap, 2007-01-21 This book presents new research on the mathematical description of tsunamis and hurricanes. The description includes dissipative terms and does not contain singularities or two-valued functions. The book uses the equivalence principle of solutions of nonlinear large gas dynamic waves and of solutions of water wave equations. An extension of the continuity equation by a source term due to evaporation rates of salt seawater helps to understand hurricanes. Detailed formula tables and results of the calculations are given.
