Loose Leaf for Applied Numerical Methods with MATLAB for Engineers and Scientists Steven C. Chapra, Dr., 2017-02-13 *Applied Numerical Methods with MATLAB* is written for students who want to learn and apply numerical methods in order to solve problems in engineering and science. As such, the methods are motivated by problems rather than by mathematics. That said, sufficient theory is provided so that students come away with insight into the techniques and their shortcomings. McGraw Hill's Connect is also available as an optional add-on item. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it, how they need it, so that class time is more effective. Connect allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the student's work. Problems are randomized to prevent sharing of answers and may also have a multi-step solution which helps move the student's learning along if they experience difficulty.
