The Architecture of Devotion: James Goold and His Legacies in Colonial Melbourne honours the life and cultural contribution of Archbishop James Alipius Goold. 1812-1886. Goold arrived in 1848 as the first Catholic bishop of the newly created diocese of Melbourne and quickly adapted to Australian colonial conditions setting about establishing an extraordinary network of schools, churches and welfare institutions across Victoria. Beyond the immediate task of building bluestone bricks and mortar, Goold carried a grand vision, sensing that Melbourne was on its way to becoming a grand international metropolis. A collector and man of refined taste, Goold not only adorned religious institutions with quality Baroque artwork but he also amassed a unique book collection and private library that showcased his European cultural sensibilities. A companion to *The Invention of Melbourne: A Baroque Archbishop and a Gothic Architect* 2019, *The Architecture of Devotion* brings Goold to life as we follow him around the colony and witness how he shaped the fabric of Victorian suburbs and towns. These volumes have been supported by the Australian Research Council which has recognised them as among the best research projects in Australia. *The Invention of Melbourne* was commended in the Victorian Community History Award. History Publication Award 2020.

*Charles Robert Cockerell, Architect in Time* Anne Bordeleau, 2016-04-15  
Speed, acceleration and rapid change characterize our world and as we design and construct buildings that are to last at least a few decades and sometimes even centuries, how can architecture continue to act as an important cultural signifier? Focusing on how an important nineteenth century architect addressed the already shifting relation between architecture, time and history, this book offers insights on issues still relevant today: the struggle between imitation and innovation, the definition or rejection of aesthetic experience, the grounds of architectural judgment, who decides and how or, fundamentally, how to act i.e. build when there is no longer a single grand narrative but a plurality of possible histories. Six drawings provide the foundation of an itinerary through Charles Robert Cockerell's conception of architecture and into the depths of drawings and buildings. Born in England in 1788, Cockerell sketched as a Grand Tourist; he

charted architectural history as Royal Academy Professor he drew to build to exhibit to understand the past and to learn from it publishing his last work in 1860 three years before his death Under our scrutiny his drawings become thresholds into the nineteenth century windows into the architect's conception of architecture and time complex documents of past and projected constructions great examples that reveal a kinetic approach to ornamentation and the depth of architectural representation
