Architecture Oriented Otherwise Writing Matters:

Architecture Oriented Otherwise David Leatherbarrow, 2009 So much writing about architecture tends to evaluate it on the basis of its intentions how closely it corresponds to the artistic will of the designer the technical skills of the builder or whether it reflects the spirit of the place and time in which it was built making it not much more than the willful or even subconscious assemblage of objects that result from design and construction techniques Renowned writer and thinker David Leatherbarrow in this groundbreaking new book argues for a richer and more profound but also simpler way of thinking about architecture namely on the basis of how it performs Not simply how it functions but how it acts its manner of existing in the world including its effects on the observers and inhabitants of a building as well as on the landscape that situates it In the process Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances intended and otherwise of buildings Drawing on an encyclopedic reading of contemporary philosophy as well as from the work of architects whose work he admires including Peter Zumthor Renzo Piano Le Corbusier and Frank Lloyd Wright Leatherbarrow challenges us to fundamentally reconsider the way we think about buildings and ask architects to think about their buildings in a vastly wider context opening up the possibility of creating works that are richer in meaning quality and life In asking for and presenting a sea change in the way of thinking about buildings and their design **Architecture Oriented Otherwise** is required reading for anybody who makes or cares about architecture

Deep Skin Architecture Timo Carl, 2019-04-25 Timo Carl presents alternatives to curtain wall facades and other flat boundaries creating autonomous spaces He investigates facade typologies with multiple material layers to strategize the relationship between buildings and their environment By revisiting Le Corbusier's seminal *brise soleil* an alternative reading of the modern project emerges one that is not based on classical compositional rules but instead on the dynamic relationships with environmental forces Finally an exciting series of project based investigations sets out innovative ways in which novel deep skins combine energy conscious performance with the poetics of architecture
