Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08. The escalating interdependency of nations drives global geopolitics to shift ever more quickly. Societies seem unable to control any change that affects their cities, whether positively or negatively. Challenges are global, but solutions need to be implemented locally. How can architectural research contribute to the future of our changing society? How has it contributed in the past? The theme of the 10th EAAE ARCC International Conference, *Architectural Research Addressing Societal Challenges*, was set to address these questions. This book, *Architectural Research Addressing Societal Challenges*, includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference, which was held at the facilities of the Faculty of Architecture of the University of Lisbon. The papers have been further divided into the following five sub-themes: a) Changing Society; b) In Transit; c) Global Migration; d) Renaturalization of the City; e) Emerging Fields of Architectural Practice and Research on Architectural Education. The EAAE ARCC International Conference, held under the aegis of the EAAE and of the ARCC, is a conference organized every other year in collaboration with one of the member schools/universities of those associations, alternatively in North America or in Europe.
