Breast Cancer Metastasis And Drug Resistance Progress And Prospects:

Breast Cancer Metastasis and Drug Resistance Aamir Ahmad, 2012-11-08 This volume comprehensively covers recent progress in breast cancer research. In an effort to successfully treat breast cancer, it is imperative to fully understand the disease with all its heterogeneity, to understand the factors that influence the metastasis of breast cancer to distant organs making it lethal, and to understand the underlying processes that lead to the phenomenon of drug resistance making the disease particularly incurable. The book explores all of these issues including the phenomenon of epithelial mesenchymal transition, cancer stem cells, as well as microRNAs, in an attempt to better understand the disease in connection to its heterogeneity, metastasis, drug resistance, as well as to propose novel signaling pathways for therapeutic intervention. The profiling of tumors to molecularly classify breast cancers is also investigated so that customized targeted therapies can be developed.

Epigenetics in Precision Medicine Jose Luis Garcia-Gimenez, 2021-11-12 In recent years, knowledge of epigenetic mechanisms underlying disease onset and progression has proven crucial for the development of novel early diagnosis and prognosis biomarkers for patient stratification and precision medicine. *Epigenetics in Precision Medicine*, a new volume in the Translational Epigenetics series, provides a thorough discussion and overview of current developments in clinical epigenetics with special emphasis on epigenetic biomarkers that can be used for clinical diagnosis, prognosis, patient stratification, and treatment monitoring. Disease types discussed include cancer, metabolic disorders, neurodegenerative diseases, bone disease, and immune-related disorders. The book examines the challenges of advancing epigenetics research and translating findings to the clinic and drug discovery in each of these areas, as well as current solutions. Chapter authors discuss how to leverage epigenomic technologies, applications, and tools such as next-generation sequencing to discover new epigenetic biomarkers in disease and drug studies. *Epigenetics in Precision Medicine* focuses on complex epigenetic mechanisms in several pathologies and explores how epigenetics can power the advance of precision medicine not only by improving in vitro diagnostic and prognostic tools but by providing new therapeutic approaches to treat human disease. Provides a thorough grounding in epigenetics-driven precision medicine with emphasis on developing and implementing early diagnosis and prognosis biomarkers and supporting patient stratification. Empowers researchers and clinicians to incorporate epigenetics in new disease research, drug discovery, and clinical practice. Features chapter contributions from international leaders in the field.

International Conference on Signal, Machines, Automation, and Algorithm Hasmat Malik, Sukumar Mishra, Y. R. Sood, Fausto Pedro García Márquez, Taha Selim Ustun, 2024-12-18 This book is a set of best quality peer-reviewed innovative research papers from the International Conference on Signals, Machines, Automation, and Algorithm SIGMAA 2023 held at Shoolini University, India, during 15-16 December 2023 in hybrid mode. This book has originality of work with the innovative ideas regarding artificial intelligence (AI) and its applications in the field of communication, computing, and power technologies.

E-Book Ian Peate,2024-04-04 Selected for 2025 Doody's Core Titles in Long Term Care and Home Care Alexander's Nursing Practice Hospital and Home Sixth Edition is the most comprehensive textbook available for undergraduate nursing students today This resource will prepare students for their future role as healthcare professionals in a variety of settings It covers all the basics of nursing including care of patients with common disorders core nursing issues like medicines management and infection prevention and control and how to nurse specific patient groups The sixth edition has been fully updated to incorporate the latest evidence policies and registration requirements and reflects the transformative changes currently occurring in healthcare policies procedures and technologies With a host of features to enhance the learning and teaching experience this book will make a significant contribution to preparing compassionate nurses who will deliver patient centred high quality and holistic care Designed to help the reader navigate the demands of the latest NMC educational requirements Expert team of contributors led by renowned editor Ian Peate OBE FRCN Fully updated with the latest evidence and trends incorporates the latest practice guidelines research findings and clinical standards relevant to the nursing field Addresses the role of nurses in primary care settings general practice nursing responsibilities chronic disease management health screening and the delivery of integrated patient centred care within the UK primary care landscape Richly illustrated throughout to reinforce key concepts demonstrate clinical procedures and engage students in active learning Includes a wide range of helpful learning features including case studies and critical thinking exercises helps the reader to analyse complex situations make evidence based decisions and communicate effectively with patients and healthcare team members Pedagogical features to help students navigate the textbook organise their learning and review key concepts efficiently Supplemented with online material including MCQs image bank critical thinking questions extra online material supplementary text website figure references and extra online images

Hepatocellular Carcinoma: Novel Treatment Strategies, volume III Fan Feng,Yinying Lu,Andrea Casadei Gardini,Xiaojie Xu ,Dechun Feng,2025-10-23 Building on the foundational knowledge established about Tyrosine Kinase Inhibitors TKIs in Volumes I and II Volume III will expand the scope also to Immune Checkpoint Inhibitors ICIs We will delve deeper into innovative therapeutic approaches for managing Hepatocellular Carcinoma HCC and intrahepatic cholangiocarcinoma ICC against their respective challenges HCC not only seriously endangers the physical and mental health of patients but also poses a significant challenge to public health The majority of patients diagnosed with advanced HCC are not eligible to receive radical treatment such as surgery targeted molecular therapy i e oral protein kinase inhibitors or precision chemotherapy i e transarterial chemoembolization or the long acting sustained release formulation of antitumor agents is the main therapeutic strategy effective for advanced HCC Although molecular targeted drugs such as Sorafenib can delay the progression of HCC disease and prolong patient survival they still present a number of challenges 1 Sorafenib treatment in advanced HCC patients There are individual differences in the initial sensitivity of patients to Sorafenib and most patients who initially respond well to Sorafenib will eventually develop

drug tolerance as the treatment progresses 2 Existing treatment strategies e g Sorafenib treatment requires oral high dose of 800mg per day can cause serious side effects while treating cancer 3 Recently Lenvatinib has been approved as a first line therapy and Regorafenib as a second line therapy with the hope that there may be further reports reviewing their tolerance in the future 4 HCC targeted drug therapy remains costly 5 Some novel agents including Donafenib Regorafenib Lenvatinib and Carbozantinib have similar Physiological mechanisms and share similar chemical structures unit with sorafenib all these compounds are built based on the skeleton structure of 1 4 pyridin 4 yloxy phenyl urea In this Research Topic we aim to provide an overview of the recent progress around HCC treatment especially HCC ICC related drug therapy and the molecular mechanism of drug resistance not only for TKIs but also for ICIs encompassing relevant basic and translational studies We welcome submission of Original Research Mini Review and Review articles focusing on the sub topics below Molecular mechanisms related to the HCC or ICC i e the molecular mechanism of antitumor drug resistance proliferation or metastasis Small molecule kinase inhibitors or chemotherapeutic drugs with new structures for HCC or ICC treatment New long acting and sustained release anti tumor drugs on HCC or ICC including chemotherapy TKIs and ICIs Nanomedicine and materials for HCC or ICC treatment Molecular markers based on novel clinical laboratory technology HCC ICC related metabolic metabolomics studies Progress in intrahepatic cholangiocarcinoma treatment and research Clinical application of surgical robots HCC ICC related organoid studies Please note manuscripts submitted consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases that are not accompanied by validation independent cohort or biological validation in vitro or in vivo are out of scope for this Research Topic

Non-coding RNAs in Breast Cancer, volume II Wenwen Zhang,Xiaoxiang Guan,Naoyuki Kataoka,2025-02-21 Breast cancer BC is the most common malignancy among females worldwide Breast cancer is a highly heterogeneous malignant tumor which is constitutive of different subtypes according to the status of estrogen receptor ER progesterone receptor PR and human epidermal growth factor receptor 2 Her 2 with diverse clinical performance biological characteristics and prognosis Despite early diagnosis and comprehensive treatment especially the development of endocrine therapy molecular targeted therapy and the emerging immunotherapies the mortality of breast cancer has still remained relatively high Therefore identification of novel biomarkers for therapeutic targets and efficacy prediction of breast cancer is urgently required The vast majority of the human genome is made up of non coding RNA ncRNA apart from about 2% protein coding genes ncRNAs including circular RNA circRNA circular RNAs circRNAs microRNAs miRNAs and long non coding RNAs lncRNAs have been one of the hot spots in recent years So far a large number of ncRNAs have been recognized and found to be dysregulated in various types of cancer including breast cancer Several ncRNAs have been reported to play critical roles in various biological processes of breast cancer including cell proliferation apoptosis migration invasion angiogenesis differentiation and drug resistance Moreover the potential of ncRNAs as diagnostic prognostic biomarkers and therapeutic targets has also been explored

extensively in breast cancer Accumulating studies indicating the significance of ncRNAs in the regulation of breast cancer development and drug resistance accelerated the investigation to explore the potential ncRNAs based therapeutics in breast cancer patients The main advantage of ncRNA based therapeutics is that it can target multiple coding or non coding genes that regulate specific or redundant pathways involved in cancer development However therapeutics based on ncRNAs encounter some obstacles such as problems associated with the delivery potential off target effects and safety
