Loose Leaf for Applied Numerical Methods with MATLAB for Engineers and Scientists Steven C. Chapra, Dr., 2017-02-13 Applied Numerical Methods with MATLAB is written for students who want to learn and apply numerical methods in order to solve problems in engineering and science As such the methods are motivated by problems rather than by mathematics That said sufficient theory is provided so that students come away with insight into the techniques and their shortcomings McGraw Hill's Connect is also available as an optional add on item Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it how they need it so that class time is more effective Connect allows the professor to assign homework quizzes and tests easily and automatically grades and records the scores of the student's work Problems are randomized to prevent sharing of answers and may also have a multi step solution which helps move the students learning along if they experience difficulty **ISE**
