Algebra And Its Applications Contemporary Mathematics:

Logic and Its Applications Andreas Blass, Yi Zhang, 2005 Two conferences Logic and Its Applications in Algebra and Geometry and Combinatorial Set Theory Excellent Classes and Schanuel Conjecture were held at the University of Michigan Ann Arbor These events brought together model theorists and set theorists working in these areas This volume is the result of those meetings It is suitable for graduate students and researchers working in mathematical logic Algebra and Its Applications Dinh Van Huynh, Surender Kumar Jain, Sergio R. López-Permouth, 2000 Among all areas of mathematics algebra is one of the best suited to find applications within the frame of our booming technological society The thirty eight articles in this volume encompass the proceedings of the International Conference on Algebra and Its Applications Athens OH 1999 which explored the applications and interplay among the disciplines of ring theory linear algebra and coding theory The presentations collected here reflect the dialogue between mathematicians involved in theoretical aspects of algebra and mathematicians involved in solving problems where state of the art research tools may be used and applied This Contemporary Mathematics series volume communicates the potential for collaboration among those interested in exploring the wealth of applications for abstract algebra in fields such as information and coding The expository papers would serve well as supplemental reading in graduate seminars Algebra and Its Applications D. V. Huynh, Dinh Van Huynh, Surender Kumar Jain, Sergio R. López-Permouth, 2006 This volume consists of contributions by speakers at a Conference on Algebra and its Applications that took place in Athens Ohio in March of 2005 It provides a snapshot of the diversity of themes and applications that interest algebraists today The papers in this volume include some of the latest results in the theory of modules noncommutative rings representation theory matrix theory linear algebra over noncommutative rings cryptography error correcting codes over finite rings and projective geometry codes as well as expository articles that will provide algebraists and other mathematicians including graduate students with an accessible introduction to areas outside their own expertise The book will serve both the specialist looking for the latest result and the novice seeking an accessible reference for some of the ideas and results presented here **Algebra and Its Applications** Dinh Van Huynh, Surender Kumar Jain, Sergio R. López-Permouth, 2000 **Finite Fields and Applications** Dieter Jungnickel, H. Niederreiter, 2001-03-20 This volume represents the refereed proceedings of the Fifth International Conference on Finite Fields and Applications F q5 held at the University of Augsburg Germany from August 2 6 1999 and hosted by the Department of Mathematics The conference continued a series of biennial international conferences on finite fields following earlier conferences at the University of Nevada at Las Vegas USA in August 1991 and August 1993 the University of Glasgow Scotland in July 1995 and the University of Waterloo Canada in August 1997 The Organizing Committee of F q5 comprised Thomas Beth University of Karlsruhe Stephen D Cohen University of Glasgow Dieter Jungnickel University of Augsburg Chairman Alfred Menezes University of Waterloo Gary L Mullen Pennsylvania State University Ronald C Mullin University of Waterloo Harald

Niederreiter Austrian Academy of Sciences and Alexander Pott University of Magdeburg The program of the conference consisted of four full days and one half day of sessions with 11 invited plenary talks and over 80 contributed talks that required three parallel sessions This documents the steadily increasing interest in finite fields and their applications Finite fields have an inherently fascinating structure and they are important tools in discrete mathematics Their applications range from combinatorial design theory finite geometries and algebraic geometry to coding theory cryptology and scientific computing A particularly fruitful aspect is the interplay between theory and applications which has led to many new perspectives in research on finite fields Surveys in Contemporary Mathematics Nicholas Young, Yemon Choi, 2008 A collection of articles showcasing the achievements of young Russian researchers in combinatorial and algebraic geometry and topology

Student's Guide to the Study, Practice, and Tools of Modern Mathematics Donald Bindner, 2010-11-29 A Student's Guide to the Study Practice and Tools of Modern Mathematics provides an accessible introduction to the world of mathematics. It offers tips on how to study and write mathematics as well as how to use various mathematical tools from LaTeX and Beamer to Mathematica and Maple to MATLAB and R. Along with a color insert, the text includes **Algebraic Curves and Their Applications** Lubjana Beshaj, Tony Shaska, 2019-02-26. This volume contains a collection of papers on algebraic curves and their applications. While algebraic curves traditionally have provided a path toward modern algebraic geometry, they also provide many applications in number theory, computer security, and cryptography, coding theory, differential equations, and more. Papers cover topics such as the rational torsion points of elliptic curves, arithmetic statistics in the moduli space of curves, combinatorial descriptions of semistable hyperelliptic curves over local fields, heights on weighted projective spaces, automorphism groups of curves, hyperelliptic curves, dessins d'enfants, applications to Painlevé equations, descent on real algebraic varieties, quadratic residue codes based on hyperelliptic curves, and Abelian varieties and cryptography. This book will be a valuable resource for people interested in algebraic curves and their connections to other branches of mathematics.
