financial statements is a brief financial analysis of each statement's highlights. With this foundation set, we then define graphs and offer analysis tips about each financial statement line item such as revenues and long-term debt. Apple Financial Ratios: Regarding Apple's financial ratios, a similar approach is taken as with the financial statements. This section starts with the financial ratios calculated for five years and a summary analysis of important financial ratios. Each financial ratio is then defined, formulas provided, calculations for the ratios illustrated, financial analysis tips offered, and the actual individual ratio graphed covering a five-year time frame in most cases. Important financial ratios defined, calculated, and analysis tips offered include the current ratio, cash ratio, quick ratio, net working capital ratio, total asset turnover ratio, fixed asset turnover ratio, days sales outstanding, inventory turnover, accounts receivable turnover, working capital turnover, accounts payable turnover, return on assets, return on equity, profit margin, gross profit margin, and several more. Apple Free Cash Flows (FCF) and 5-Year Projections: We conclude the financial review of Apple by projecting their summarized income statement, balance sheet, and free cash flows for the NEXT 5 years. In the end, hopefully, you will have a better understanding of Apple's financial statements, financial ratios, free cash flows (FCF), and financial projections in general. Further, you will also again hopefully have a thorough understanding of Apple's financial position now and in the future based on the reviews and brief analysis provided.
