Articulating Reasons An Introduction To Inferentialism:

Articulating Reasons Robert B. Brandom, 2001-10-15 Brandom is one of the most original philosophers of our day whose book *Making It Explicit* covered and extended a vast range of topics in metaphysics epistemology and philosophy of language the core of analytic philosophy This new work provides an approachable introduction to the complex system that *Making It Explicit* mapped out

The Intentional Spectrum and Intersubjectivity Michael D. Barber, 2011-06-15 World renowned analytic philosophers John McDowell and Robert Brandom dubbed Pittsburgh Neo Hegelians recently engaged in an intriguing debate about perception In *The Intentional Spectrum and Intersubjectivity* Michael D Barber is the first to bring phenomenology to bear not just on the perspectives of McDowell or Brandom alone but on their intersection He argues that McDowell accounts better for the intelligibility of empirical content by defending holistically functioning reflectively distinguishable sensory and intellectual intentional structures He reconstructs dimensions implicit in the perception debate favoring Brandom on knowledge s intersubjective features that converge with the ethical characteristics of intersubjectivity Emmanuel Levinas illuminates Phenomenology becomes the third partner in this debate between two analytic philosophers critically mediating their discussion by unfolding the systematic interconnection among perception intersubjectivity metaphilosophy and ethics

The Routledge Companion to Historical Theory Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence

The Self-Deceiving Muse Alan Singer, 2010-01-01 Current philosophical discussions of self deception remain steeped in disagreement and controversy In *The Self Deceiving Muse* Alan Singer proposes a radical revision of our commonplace understanding of self deception Singer asserts that self deception far from being irrational is critical to our capacity to be acute noticers of our experience The book demonstrates how self deception can be both a resource for rational activity generally and more specifically a prompt to aesthetic innovation It thereby provides new insights into the ways in which our imaginative powers bear on art and life The implications philosophical aesthetic and ethical of such a proposition indicate the broadly interdisciplinary thrust of this work which incorporates readings of novels

paintings films and video art *German Idealism* Espen Hammer, 2007-08-07 This outstanding collection of specially commissioned chapters examines German idealism from several angles and assesses the renewed interest in the subject from a wide range of fields Including discussions of the key representatives of German idealism such as Kant Fichte and Hegel it is structured in clear sections dealing with metaphysics the legacy of Hegel s philosophy Brandom and Hegel recognition and agency autonomy and nature the philosophy of German romanticism Amongst other important topics German Idealism Historical and Philosophical Perspectives addresses the debates surrounding the metaphysical and epistemological legacy of German idealism its importance for understanding recent debates in moral and political thought its appropriation in recent theories of language and the relationship between mind and world and how German idealism affected subsequent movements such as romanticism pragmatism and critical theory Contributors Espen Hammer Stephen Houlgate Sebastian Gardner Paul Redding Andrew Bowie Richard Eldridge Jay Bernstein Frederick Beiser Paul Franks Robert Pippin Fred Rush Manfred Frank Terry Pinkard Robert Stern **Hegel, Literature, and the Problem of Agency** Allen Speight, 2001-02-05 A study of Hegel s appeal to literature in the *Phenomenology of Spirit* **Issues in Science and Theology: Are We Special?** Michael Fuller, Dirk Evers, Anne Runehov, Knut-Willy Sæther, 2017-10-23 This book offers a penetrating analysis of issues raised by the perennial question Are We Special It brings together scholars from a variety of disciplines from astronomy and palaeontology to philosophy and theology to explore this question Contributors cover a wide variety of issues including what makes humans distinct from other animals the possibilities of artificial life and artificial intelligence the likelihood of life on other planets and the role of religious behavior A variety of religious and scientific perspectives are brought to bear on these matters As a whole the book addresses whether the issue of human uniqueness is one to which sciences and religions necessarily offer differing responses **Metaphysics and the Future of Theology** William J. Meyer, 2010-01-01 William J Meyer engages in critical and illuminating conversation with major figures in contemporary philosophy and theology in order to explain why theology has been marginalized in modern culture and why modernity has had such difficulty integrating religion and public life Wrestling with notable philosophers like MacIntyre and Stout and theologians such as Gustafson Hauerwas Porter Milbank and Reinhold Niebuhr Meyer argues that theology must embrace modernity s formal commitments to public and democratic discourse while simultaneously challenging its substantive postmetaphysical outlook Drawing on the philosophical perspectives of Whitehead and Hartshorne and the theologies of Ogden and Gamwell he concludes that a process metaphysical theology offers the most promising path for theology to regain a vital public voice in the world of the twenty first century **The Lvov-Warsaw School. Past and Present** Ángel Garrido, Urszula Wybraniec-Skardowska, 2018-06-12 This is a collection of new investigations and discoveries on the history of a great tradition the Lvov Warsaw School of logic and mathematics by the best specialists from all over the world The papers range from historical considerations to new philosophical logical and mathematical developments of this impressive School

including applications to Computer Science Mathematics Metalogic Scientific and Analytic Philosophy Theory of Models and Linguistics **Scientific Concepts and Investigative Practice** Uljana Feest, Friedrich Steinle, 2012-10-30 Recent philosophy and history of science has seen a surge of interest in the role of concepts in scientific research Scholars working in this new field focus on scientific concepts rather than theories as units of analysis and on the ways in which concepts are formed and used rather than on what they represent They analyze what has traditionally been called the context of discovery rather than or in addition to the context of justification And they examine the dynamics of research rather than the status of the finished research results This volume provides detailed case studies and general analyses to address questions raised by these points such as Can concepts be clearly distinguished from the sets of beliefs we have about their referents What if any sense can be made of the separation between concepts and theories Can we distinguish between empirical and theoretical concepts Are there interesting similarities and differences between the role of concepts in the empirical sciences and in mathematics What underlying notion of investigative practice could be drawn on to explicate the role of concept in such practice From a philosophical point of view is the distinction between discovery and justification a helpful frame of reference for inquiring into the dynamics of research From a historiographical point of view does a focus on concepts face the danger of falling back into an old fashioned history of ideas
