Artificial Intelligence for Humans Jeff Heaton, 2013 Artificial Intelligence for Humans is a book series meant to teach AI to those readers who lack an extensive mathematical background The reader only needs knowledge of basic college algebra and computer programming Additional topics are thoroughly explained Every chapter also includes a programming example Examples are currently provided in Java C and Python Other languages are planned Advanced Methodologies and Technologies in Artificial Intelligence, Computer Simulation, and Human-Computer Interaction Khosrow-Pour, D.B.A., Mehdi, 2018-09-28 As modern technologies continue to develop and evolve the ability of users to adapt with new systems becomes a paramount concern Research into new ways for humans to make use of advanced computers and other such technologies through artificial intelligence and computer simulation is necessary to fully realize the potential of tools in the 21st century Advanced Methodologies and Technologies in Artificial Intelligence Computer Simulation and Human Computer Interaction provides emerging research in advanced trends in robotics AI simulation and human computer interaction Readers will learn about the positive applications of artificial intelligence and human computer interaction in various disciplines such as business and medicine This book is a valuable resource for IT professionals researchers computer scientists and researchers invested in assistive technologies artificial intelligence robotics and computer simulation **Engineering Analytics** Luis Rabelo, Edgar Gutierrez-Franco, Alfonso Sarmiento, Christopher Mejía-Argueta, 2021-09-26 Engineering analytics is becoming a necessary skill for every engineer Areas such as Operations Research Simulation and Machine Learning can be totally transformed through massive volumes of data This book is intended to be an introduction to Engineering Analytics that can be used to improve performance tracking customer segmentation for resource optimization patterns and classification strategies and logistics control towers Basic methods in the areas of visual descriptive predictive and prescriptive analytics and Big Data are introduced Industrial case studies and example problem demonstrations are used throughout the book to reinforce the concepts and applications The book goes on to cover visual analytics and its relationships simulation from the respective dimensions and Machine Learning and Artificial Intelligence from different paradigms viewpoints The book is intended for professionals wanting to work on analytical problems for Engineering students Researchers Chief Technology Officers and Directors that work within the areas and fields of Industrial Engineering Computer Science Statistics Electrical Engineering Operations Research and Big Data *Towards Smart World* Lavanya Sharma, 2020-12-13 Towards Smart World Homes to Cities Using Internet of Things provides an overview of basic concepts from the rising of machines and communication to IoT for making cities smart real time applications domains related technologies and their possible solutions for handling relevant challenges This book highlights the utilization of IoT for making cities smart and its underlying technologies in real time application areas such as emergency departments intelligent traffic systems indoor and outdoor securities automotive industries environmental monitoring business entrepreneurship

facial recognition and motion based object detection Features The book covers the challenging issues related to sensors detection and tracking of moving objects and solutions to handle relevant challenges It contains the most recent research analysis in the domain of communications signal processing and computing sciences for facilitating smart homes buildings environmental conditions and cities It presents the readers with practical approaches and future direction for using IoT in smart cities and discusses how it deals with human dynamics the ecosystem and social objects and their relation It describes the latest technological advances in IoT and visual surveillance with their implementations This book is an ideal resource for IT professionals researchers undergraduate or postgraduate students practitioners and technology developers who are interested in gaining deeper knowledge and implementing IoT for smart cities real time applications areas and technologies and a possible set of solutions to handle relevant challenges Dr Lavanya Sharma is an Assistant Professor in the Amity Institute of Information Technology at Amity University UP Noida India She has been a recipient of several prestigious awards during her academic career She is an active nationally recognized researcher who has published numerous papers in her field

Brain Technology in Augmented Cognition Suraj Sood, 2024-10-24 *Brain Technology in Augmented Cognition* Current and Future Trends informs engineers interested in human computer interaction about the current state of augmented cognition Its scope includes recent advances in electroencephalography EEG neural network NN and brain computer interface BCI brain technologies The title explores in detail each technological approach to augmented cognition and offers conclusions to them summarizing the work and their respective futures Augmented cognition research often includes the use of brain technology and this book addresses advances in augmented cognition and its applications It details recent uses of EEG NN and BCI in the field and how they may augment user researcher and practitioner cognition Focusing on the use of EEG for eye tracking NN logic and the BCI application of motor imagery MI and discussing challenges and opportunities relevant to such applications the title is a useful introduction to the subject matter This is an engaging read for any student researcher or academic in the fields of engineering augmented cognition human computer interaction and human factors ergonomics who will learn the basics and key concepts of augmented cognition through this simple and straightforward title

Encyclopedia of Information Science and Technology, Fourth Edition Khosrow-Pour, D.B.A., Mehdi, 2017-06-20 In recent years our world has experienced a profound shift and progression in available computing and knowledge sharing innovations These emerging advancements have developed at a rapid pace disseminating into and affecting numerous aspects of contemporary society This has created a pivotal need for an innovative compendium encompassing the latest trends concepts and issues surrounding this relevant discipline area During the past 15 years the Encyclopedia of Information Science and Technology has become recognized as one of the landmark sources of the latest knowledge and discoveries in this discipline The Encyclopedia of Information Science and Technology Fourth Edition is a 10 volume set which includes 705 original and previously unpublished research articles covering a full range of perspectives

applications and techniques contributed by thousands of experts and researchers from around the globe This authoritative encyclopedia is an all encompassing well established reference source that is ideally designed to disseminate the most forward thinking and diverse research findings With critical perspectives on the impact of information science management and new technologies in modern settings including but not limited to computer science education healthcare government engineering business and natural and physical sciences it is a pivotal and relevant source of knowledge that will benefit every professional within the field of information science and technology and is an invaluable addition to every academic and corporate library

Beyond Algorithms James Luke, David Porter, Padmanabhan Santhanam, 2022-05-29 With so much artificial intelligence AI in the headlines it is no surprise that businesses are scrambling to exploit this exciting and transformative technology Clearly those who are the first to deliver business relevant AI will gain significant advantage However there is a problem Our perception of AI success in society is primarily based on our experiences with consumer applications from the big web companies The adoption of AI in the enterprise has been slow due to various challenges Business applications address far more complex problems and the data needed to address them is less plentiful There is also the critical need for alignment of AI with relevant business processes In addition the use of AI requires new engineering practices for application maintenance and trust So how do you deliver working AI applications in the enterprise **Beyond Algorithms** Delivering AI for Business answers this question Written by three engineers with decades of experience in AI and all the scars that come with that this book explains what it takes to define manage engineer and deliver end to end AI applications that work This book presents Core conceptual differences between AI and traditional business applications A new methodology that helps to prioritise AI projects and manage risks Practical case studies and examples with a focus on business impact and solution delivery Technical Deep Dives and Thought Experiments designed to challenge your brain and destroy your weekends
