Asm Specialty Handbook Aluminum And Aluminum Alloys:

Aluminum and Aluminum Alloys Joseph R. Davis,1993-01-01 This one stop reference is a tremendous value and time saver for engineers designers and researchers Emerging technologies including aluminum metal matrix composites are combined with all the essential aluminum information from the ASM Handbook series with updated statistical information

ASM Specialty Handbook - Aluminum and Aluminum Alloys Joseph R. Davis,1993 **ASM Specialty Handbook** M. M. Avedesian,Hugh Baker,1999-01-01 This ASM Handbook is the most comprehensive collection of engineering information on this important structural material published in the last sixty years Prepared with the cooperation of the International Magnesium Association it presents the current industrial practices and provides information and data about the properties and performance of magnesium alloys Materials science and engineering are covered including processing properties and commercial uses Aluminum Alloy Castings John Gilbert Kaufman,Elwin L. Rooy,2004-01-01 J G Gil Kaufman is currently president of his consulting company Kaufman Associates **Aluminium Alloys** Jürgen Hirsch,Birgit Skrotzki,Günter Gottstein,2008-11-17 Aluminium is a well established modern lightweight engineering and functional material with a unique combination of specific properties like strength formability durability conductivity corrosion resistance etc It is present in many intelligent solutions in established markets like building transport packaging printing and many others in our fast moving modern society The various aluminium alloys can be processed quite efficiently in large quantities by conventional fabrication routes as well as in special sophisticated forms and material combinations for highly innovative high tec solutions and applications This book contains latest information about all these aspects in form of the refereed papers of the II th International Conference on Aluminium Alloys ICAA where world wide experts from academia and engineers from industry present latest results and new ideas in fundamental as well as applied research Since 22 years the ICAA series provides scientists and engineers with a complete overview over the latest scientific and technological developments featuring profound technology based overviews and new innovative perspectives This book is a reference for the scientific community as well as for the aluminium industry working on aluminium alloy development processing and application issues It gives a global perspective on the current focus of international research with emphasis on in depth understanding of specific properties and applications of conventional and advanced aluminium alloys **Microbial Degradation Processes in Radioactive Waste Repository and in Nuclear Fuel Storage Areas** J.H. Wolfram,Robin D. Rogers,Lajos G. Gázsó,1997-03-31 Purpose ofthe Workshop In the spirit of enhancing developments in science and technology by facilitating international scientific cooperation the Science Committee of NATO is sponsoring AR W s in several selected priority areas The objective of this workshop was to discuss what microbial mediated problems have been experienced in the area of nuclear waste management and spent fuel storage Long term storage of high level wastes in repositories is just starting in some countries However low and medium level wastes have been stored for several decades In

the area of spent fuel interim storage has been extended at many locations far beyond the intended time It was a priority of the workshop to examine and discuss what deleterious effects have been observed under these storage conditions or under conditions used in simulated trial tests for predicting material performance under the storage conditions For example one chronic problem that was discussed was possibility that microbial influenced corrosion MIC could be taking place in the wet storage of spent fuel thereby initiating or accelerating the process of corrosion Another discussion in the area of waste forms focused on the presence of biofilms which may be breaking down the structure of the waste form and thereby jeopardizing its integrity The meeting focused on discussing the observations and data collected relating to problems encountered in the storage of these types of wastes and sharing this information with others that have not monitored their facilities for similar problems
