Assembly Manual Shelterlogic:

Hot Line Farm Equipment Guide Quick Reference Guide ,2006 Software and Mind Andrei Sorin,2013-01-01

Addressing general readers as well as software practitioners Software and Mind discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities But while useful in fields like mathematics and manufacturing this idea is generally worthless because most aspects of the world are too complex to be reduced to simple hierarchical structures Our software related affairs in particular cannot be represented in this fashion And yet all programming theories and development systems and all software applications attempt to reduce real world problems to neat hierarchical structures of data operations and features Using Karl Popper s famous principles of demarcation between science and pseudoscience the book shows that the mechanistic ideology has turned most of our software related activities into pseudoscientific pursuits Using mechanism as warrant the software elites are promoting invalid even fraudulent software notions They force us to depend on generic inferior systems instead of allowing us to develop software skills and to create our own systems Software mechanism emulates the methods of manufacturing and thereby restricts us to high levels of abstraction and simple isolated structures The benefits of software however can be attained only if we start with low level elements and learn to create complex interacting structures Software the book argues is a non mechanistic phenomenon So it is akin to language not to physical objects Like language it permits us to mirror the world in our minds and to communicate with it Moreover we increasingly depend on software in everything we do in the same way that we depend on language Thus being restricted to mechanistic software is like thinking and communicating while being restricted to some ready made sentences supplied by an elite Ultimately by impoverishing software our elites are achieving what the totalitarian elite described by George Orwell in Nineteen Eighty Four achieves by impoverishing language they are degrading our minds *The AOPA Pilot* ,2006
