Assessing Ocular Toxicology in Laboratory Animals Andrea B Weir, Margaret Collins, 2012-12-04 Ocular toxicity is routinely assessed in toxicology studies conducted for regulatory purposes Ocular anatomy and physiology and the assessment of ocular toxicity itself can be challenging to scientists involved in the safety assessment of pharmaceuticals pesticides and other agents Anatomical and physiological differences between species can impact the nature of ocular effects observed following intended or unintended exposure of ocular tissues to xenobiotics Ocular Toxicity in Laboratory Animals provides a concise reference addressing ocular anatomy and physiology across species that will enhance the design and interpretation of toxicology studies conducted for regulatory purposes The book provides an overview of routine and advanced techniques that are used to assess ocular toxicity including slit lamp biomicroscopy indirect ophthalmoscopy electrophysiology and imaging methods for the anterior and posterior segments of the eye Additionally the book defines the regulatory expectations for pharmaceuticals intended to treat ocular diseases and for other non pharmaceutical regulated chemicals With contributions from experts in the field Ocular Toxicity in Laboratory Animals is an authoritative accessible guide for toxicologists and other scientists involved in conducting toxicology studies for regulatory purposes and or reviewing data from such studies **Assessing Ocular Toxicology in Laboratory Animals** Springer, 2012-12-01 Atlas of

Sahota,Robert H. Spaet,Zbigniew W. Wojcinski,2024-03-25 There has been an enormous growth of interest in the field of toxicologic pathology and particularly on its impact on nonclinical safety assessment in global drug development and in the environment Toxicologic pathologists play an important role in detecting test article related adverse effects by characterizing morphologic changes in animal tissues and or body fluids under prescribed study conditions or less clearly defined conditions in the environment and in the interpretation of these findings relative to human risk In fact pathology evaluation is often the single most important decision making factor in nonclinical safety assessments as 80% of drug candidate attrition has been attributed to pathology findings in toxicity studies There are currently no primers or basic overviews covering the field of toxicologic pathology whereas there are at least several basic books that cover the sister field of toxicology Toxicologic Pathology A Primer is a practical easy to use reference designed to contain core information provided by board certified veterinary pathologists all experts in the field The Primer contains the basic underlying principles of toxicologic pathology at the introductory level thus it will be valuable to the veterinary pathology student who may be considering a career in the field as well as a companion to the seasoned toxicologic pathologist who wants a succinct refresher The Primer is arranged as chapters presenting each major organ system preceded by an overview chapter covering the field of toxicologic pathology followed by a concept chapter describing

Dictionary of Toxicology Pathology and Safety Science IDTP that this dictionary aims to fill The language of toxicologic pathology may be less familiar to a broad range of safety scientists especially those involved in the safety evaluation of pharmaceuticals and chemicals The IDTP format provides the brevity and clarity that the user is not likely to receive in a textbook even if adequately indexed With the inclusion of descriptions for terms used in toxicology drug metabolism pharmacokinetics and regulatory science the scope of the IDTP is considerably broadened and decidedly unique in its appeal to all safety scientists With over 800 photos and illustrations to provide visual context an important aim of the IDTP is to present pathological changes as reference examples for terminology nomenclature and term descriptions for the entry level as well as seasoned toxicologic pathologist It will also aid students and non pathology specialists such as study directors senior toxicology report reviewers scientific management of contract research organizations regulatory agencies and drug development companies to better understand the biological significance of tissue changes The IDTP provides a single reference volume for these users to further their understanding and appreciation of biologically significant pathology findings The IDTP consists of four major areas 1 A Z Dictionary of Pathology encompassing all organ systems together with relevant non pathology terms supported by references in For Further Reading sections 2 Appendix 1 An Overview of Drug Development Nonclinical Safety Toxicologic Pathology and Important Special Topics 3 Appendix 2 Diagnostic Criteria of for Proliferative Lesions in Rodents Rat and Mouse and Selected Non Rodent Laboratory Species containing illustrations with detailed references and links to source material 4 Appendix 3 Mini Atlas of Organ System Anatomy and Histology to help reacquaint the non pathologist safety scientist with many normal anatomical structures The editors and contributing scientists board certified veterinary pathologists board certified toxicologists allied health safety scientists health regulatory representatives have experience from bench level pathology and toxicology to managing global preclinical safety units in leading pharmaceutical companies They have considerable experience mentoring pharmaceutical industry project team members interacting with industry clinicians and representatives of decision making bodies within the industry as well as with global health authorities such as the FDA and EMA These activities convinced them of the necessity for and usefulness of the IDTP As experts in their field they have undertaken the hard work of writing and compiling the information making the IDTP an exceptional go to reference Illustrations Editor Gregory Argentieri Veterinary Ophthalmology Kirk N.
