Teaching-Learning Contemporary Physics Beata Jarosievitz, Csaba Sükösd, 2021-09-15 This book presents research contributions focussing on the introduction of contemporary physics topics mainly but not exclusively quantum physics into high school curricula Despite the important advances and discoveries in quantum physics and relativity which have revolutionized our views of nature and our everyday lives the presence of these topics in high school physics education is still lacking In this book physics education researchers report on the teaching and learning of quantum physics from different perspectives and discuss the design and use of different pedagogical approaches and educational pathways There is still much debate as to what content is appropriate at high school level as well what pedagogical approaches and strategies should be adopted to support student learning Currently there is a greater focus on how to teach modern physics at the high school level rather than classical physics However teachers still lack experience and availability of appropriate teaching and learning materials to support the coherent integration of Quantum Physics in high school curricula All of the 19 papers presented in this book discuss innovative approaches for enhancing physics education in schools

RECLAIMING FOCUS IN THE AGE OF AI Vivian Atud, 2023-04-06 The Impact of Artificial Intelligence on Our Ability to Focus and Think Deeply In today's digital age our attention is constantly being pulled in multiple directions by an endless stream of notifications emails and social media alerts The rise of artificial intelligence AI has further complicated our ability to focus and think deeply making it harder to concentrate on the tasks at hand Research has shown that AI can both enhance and hinder our ability to focus and think deeply For example AI powered brain training programs have been shown to improve attention and memory in older adults Wolinsky et al 2013 Additionally AI can be used to reduce distractions in the workplace by automatically filtering out irrelevant emails or messages Baumeister et al 2018 On

the other hand AI can also be a source of distraction and information overload Social media platforms for example are designed to capture our attention and keep us engaged for as long as possible Fletcher 2018 This can lead to a constant state of hyperstimulation that can interfere with our ability to think deeply and creatively Furthermore cultural factors play a significant role in our ability to focus and think deeply In a culture that values speed productivity and multitasking there is often a pressure to prioritize quantity over quality Rosen 2008 Additionally social norms and peer pressure can make it difficult to disconnect from technology and create a more focused environment Kushlev et al 2016 In this book I explore the intersection of AI and attention and provide practical strategies for reclaiming our ability to focus and think deeply in the age of distraction I delve into the myths and realities of multitasking navigate the attention economy and digital distractions and explore the synergy of mindfulness and AI To optimize our brains for deep thinking I discuss the importance of sleep and exercise in enhancing cognitive function Hillman et al 2014 I also explore how to embrace the mindset of a deep thinker in the age of AI and technological change The future of attention and deep thinking in the context of AI is an important topic that I examine As AI continues to evolve and impact our lives in ways we cannot yet imagine it is crucial that we develop the skills necessary to stay focused and think deeply in the face of constant distraction Join me on a journey to reclaim our ability to focus and think deeply in the age of AI Let s explore the challenges and opportunities of attention in the digital age and learn how to cultivate a more mindful creative and productive life Together we can reclaim our attention and achieve our full potential in a distracted world
