Embedded Automation in Human-Agent Environment Jeff Tweedale,Lakhmi C. Jain,2011-09-25 This research book proposes a general conceptual framework for the development of automation in human agents environments that will allow human agent teams to work effectively and efficiently We examine various schemes to implement artificial intelligence techniques in agents The text is directed to the scientists application engineers professors and students of all disciplines interested in the agency methodology and applications

Soft Computing Techniques in Knowledge-based Intelligent Engineering Systems L. C. Jain,1997-10-09 Presented are the theory and applications of soft computing paradigms including knowledge based techniques neural networks fuzzy systems and genetic algorithms in engineering system design The book contains 11 chapters The first four provide an introduction to to the knowledge based systems neural networks fuzzy systems and evolutionary computing techniques The last 7 chapters include the applications of knowledge based systems in engineering productivity quality and technology transfer knowledge based sytems in real time

applications logic grammar in electronic circuit representation applications of neural networks evolution of neural structure based on cellular automata application of ART and ARTMAP in self organising learning recognition and production and applications of fuzzy systems Publications of the National Institute of Standards and Technology ... Catalog National Institute of Standards and Technology (U.S.), National Institute of Standards and Technology (U.S.). Information Resources and Services Division, 1994 *Expert Systems and Robotics* Timothy Jordanides, Bruce Torby, 2012-12-06 The areas of intelligent machines or robotic systems is of enormous technological and economic interest as competition in productivity intensifies This volume gives the proceedings of the 1990 Advanced Study Institute on Expert Systems and Robotics It presents research work already accomplished in the analytical theory of intelligent machines work in progress and of current interest and some specific examples for further research The papers in the volume range from the most theoretical to some descriptions of very practical working robots The papers are organized into sections on vision and image analysis robotic sensory systems software hardware and system simulation robot control applications and reports of group meetings

Parallel Architectures for Data/knowledge-based Systems L. L. Miller, A. R. Hurson, 1995 The Acquisition of Strategic Knowledge Thomas R. Gruber, 2013-07-10 The Acquisition of Strategic Knowledge deals with the automation of the acquisition of strategic knowledge and describes a knowledge acquisition program called ASK which elicits strategic knowledge from domain experts and puts it in operational form This book explores the dynamics of intelligent systems and how the components of knowledge systems including a human expert interact to produce intelligence Emphasis is placed on how to represent knowledge that experts require to make decisions about actions The move toward abstract tasks and how tasks are solved are discussed along with their implications for knowledge acquisition particularly the acquisition of expert strategies This book is comprised of eight chapters and begins with an overview of the knowledge acquisition problem for strategic knowledge as well as the relevance of strategic knowledge to artificial intelligence The next chapter describes a dialog session between the ASK knowledge acquisition assistant and the user the expert The discussion then turns to software architecture with which to represent strategic knowledge design and implementation of an assistant for acquiring strategic knowledge and approaches to knowledge acquisition Two applications of the ASK system are considered to evaluate the usability of the elicitation technique with real users and to test the adequacy of the strategy rule representation upon which the approach is dependent The scope of ASK its sources of power and its underlying assumptions are also outlined This monograph will be a valuable resource for knowledge systems designers and those interested in artificial intelligence and expert systems
