A Short Course In Mathematical Methods With Maple:

A Short Course in Mathematical Methods with Maple Henrik Aratyn, Constantin Rasinariu, 2006 This unique book provides a streamlined self contained and modern text for a one semester mathematical methods course with an emphasis on concepts important from the application point of view Part I of this book follows the paper and pencil presentation of mathematical methods that emphasizes fundamental understanding and geometrical intuition In addition to a complete list of standard subjects it introduces important contemporary topics like nonlinear differential equations chaos and solitons Part II employs the Maple software to cover the same topics as in Part I in a computer oriented approach to instruction Using Maple liberates students from laborious tasks while helping them to concentrate entirely on concepts and on better visualizing the mathematical content The focus of the text is on key ideas and basic technical and geometric insights presented in a way that closely reflects how physicists and engineers actually think about mathematics Applying Maths in the Chemical and

Smeltzer, 2010-12-31

Euclidean plane geometry is one of the oldest and most beautiful topics in mathematics Instead of carefully building geometries from axiom sets this book uses a wealth of methods to solve problems in Euclidean geometry Many of these methods arose where existing techniques proved inadequate In several cases the new ideas used in solving specific problems later developed into independent areas of mathematics This book is primarily a geometry textbook but studying geometry in this way will also develop students appreciation of the subject and of mathematics as a whole For instance despite the fact that the analytic method has been part of mathematics for four centuries it is rarely a tool a student considers using when faced with a geometry problem Methods for Euclidean Geometry explores the application of a broad range of mathematical topics to the solution of Euclidean problems
