Civic Engagement of Asian American Student Leaders Ma. Glenda Lopez Wui, Cameron S. White, 2022-11-23 Civic Engagement of Asian American Student Leaders examines the civic lives of Asian American youth and analyzes their civic engagement through in depth interviews with fifteen student leaders from a Tier One university in Southeast Texas This book provides a counter narrative to the portrayal of Asian Americans as apolitical and less interested in civic matters Such depictions arise from the characterization of Asian Americans as model minority who mainly focus on economic success and are socially and economically integrated in American society However the stories of the student leaders cultivated by Ma Glenda Lopez Wui and Cameron S White illustrate that their challenging racialized experiences inspired their civic involvement Their civic engagement creates empowerment in terms of asserting their ethnic identity imbibing leadership qualities and long term commitment to civic engagement and subverting stereotypes against Asian Americans The book paints a more varied picture of Asian American youth civic engagement that is not entirely anchored in ethnic identity or non political involvement contrary to articulations of existing studies Wui and White hope that the student leaders narratives shed better light on the civic commitments of Asian Americans to American society especially in these times when there is increased bias and racial prejudice in the current atmosphere and culture

Culturally Responsive Counseling with Asian American Men William Ming Liu, Derek Kenji Iwamoto, Mark H. Chae, 2011-01-19 Asian American men represent a complex group with

distinct psychological and mental health concerns yet the current counseling literature is lacking in resources for clinicians working with this population. The purpose of this text is to provide practitioners with a comprehensive overview of the current research and theory related to the important and unique issues that Asian American men experience. It offers clinicians culturally responsive practical counseling techniques and strategies to help inform them on how to work effectively with this group. Chapters are written by leading figures in the field and explore such topics as intergenerational conflict, racism, challenges associated with masculinity and fatherhood, sexual orientation, identity development, substance abuse, and career counseling. Numerous clinical vignettes and case conceptualizations are included to assist clinicians who work with Asian American men and to demonstrate appropriate treatment responses.

Encyclopedia of Asian American Issues Today Edith Wen-Chu Chen, Grace J. Yoo, Wendy Ng, 2009-12-23. This is a revealing compilation of essays on the latest research and debates on Asian Americans, a growing and influential ethnic group today. *Encyclopedia of Asian American Issues Today* is the first major reference work focused on the full expanse of contemporary Asian American experiences in the United States. Drawing on over two decades of research, it takes an unprecedented look at the major issues confronting the Asian American community as a whole and the specific ethnic identities within that community from established groups such as Chinese, Japanese, and Korean Americans to newer groups such as Cambodian and Hmong Americans. Across two volumes, *Encyclopedia of Asian American Issues Today* offers 110 entries on the current state of affairs, controversies, successes, and outlooks for the future for Asian Americans. The set is divided into 11 thematic sections including diversity and demographics, education, health, identity, immigrants, refugees, and citizenship, law, media, politics, war, work, and economy, youth, family, and the aged. Contributors include leading experts in the fields of Asian American studies, education, public health, political science, law, economics, and psychology.

Asian American and Pacific Islander Children and Mental Health Frederick T. Leong, Linda Juang, Desiree B. Qin, Hiram E. Fitzgerald, 2011-05-26. This first of its kind two-volume set examines physical, psychological, social, and environmental factors that undermine or support healthy development in Asian American children. How do skin color, culture, racial and ethnic identities, politics, economics, and environment influence children's mental health and academic success? *Asian American and Pacific Islander Children and Mental Health* spotlights these forces and more. This unique two-volume work examines a wide range of factors that affect children, including family conditions and economic status, child abuse, substance abuse, gangs, and community stability, as well as prejudices such as the common expectation that Asian Americans are a model minority and their children are "whiz kids." Since education is key to success, contributors consider the factors affecting Asian American children largely in the context of educational readiness and academic adjustment. However, the set is not limited to exploring problems; it also looks at factors that help Asian American children be mentally healthy, engaged, and successful at school and in later life. Volume one of the set explores development and context, while volume two looks at prevention and treatment.
