Deception in Court: Open Issues and Detection Techniques Cristina Scarpazza, Giuseppe Sartori, 2020-07-08

Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury Gerald Young, 2014-02-11 This book is a comprehensive analysis of the definitions concepts and recent research on malingering feigning and other response biases in psychological injury forensic disability populations It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In *Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury* Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young's immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for *Psychological Injury and the Law* Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist **Murder in the Courtroom** Brigitte Vallabhajosula Ph.D., 2015-01-02 Answers to many legal questions often depend on our understanding of the relationship between the human brain and behavior While there is no evidence to suggest that violence is the sole result of cognitive impairment research does suggest that frontal lobe impairment in particular may contribute to the etiology of violent behavior *Murder in the Courtroom* presents a comprehensive and detailed analysis of issues most

relevant to answering questions regarding the link between cognitive functioning and violence It is the first book to focus exclusively on the etiology and assessment of cognitive impairment in the context of violent behavior and the challenges courts face in determining the reliability of neuroscience evidence provide objective discussions of currently available neuropsychological tests and neuroimaging techniques and their strengths and limitations provide a methodology for the assessment of cognitive dysfunction in the context of violent behavior that is likely to withstand a Daubert challenge and include detailed discussions of criminal cases to illustrate important points Clinical and forensic psychologists and psychiatrists cognitive neuroscientists and legal professionals will be able to use this book to further their understanding of the relationship between brain function and extreme violence

Psychological Testing in the Service of Disability

Determination Institute of Medicine, Board on the Health of Select Populations, Committee on Psychological Testing, Including Validity Testing, for Social Security Administration Disability Determinations, 2015-06-29 The United States Social Security Administration SSA administers two disability programs Social Security Disability Insurance SSDI for disabled individuals and their dependent family members who have worked and contributed to the Social Security trust funds and Supplemental Security Income SSSI which is a means tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits SSA establishes the presence of a medically determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria which include symptoms and signs These impairments are established largely on reports of signs and symptoms of impairment and functional limitation Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA This report critically reviews selected psychological tests including symptom validity tests that could contribute to SSA disability determinations The report discusses the possible uses of such tests and their contribution to disability determinations Psychological Testing in the Service of Disability Determination discusses testing norms qualifications for administration of tests administration of tests and reporting results The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases

Personal Injury and Damage Ascertainment under Civil Law Santo Davide Ferrara, Rafael Boscolo-Berto, Guido Viel, 2016-10-06 This volume serves to provide an international overview of personal injury compensation in different geographical areas 15 countries already included with a special focus on the methods used to ascertain the injury and the related damages It also goes on to clarify the logical and methodological steps required for a sequential in depth ascertainment of any traumatic event and the related personal damage both pecuniary and non pecuniary Personal injury is a legal term for an injury to the body mind or emotions suffered by the plaintiff under tort and or civil law regulations Damages related to the injury can be pecuniary or non pecuniary in nature Although several comparative studies

and research projects on tort and civil law and personal injury claims aimed at developing new tools for promoting harmonization of private law have been performed at an international level heterogeneity and divergences still exist in the definition and compensation of personal injury and damage across different national legislative systems The starting point for any awarding procedure should be a medical or rather a medico legal assessment to gain evidence on the trauma or event causing the injury the mechanism of injury the pre existing health status of the injured party and the health consequences of the injury temporary and permanent impairment work incapacity etc In order to pursue the ultimate goal of an international harmonization of personal injury compensation it is of utmost importance to define the quality requirements for the medico legal ascertainment methodology which are essential for guaranteeing the objectivity rigor and reproducibility of the data and the evidence collection procedure Currently there are no supra national medico legal guidelines dealing with the ascertainment methodology of personal injury and damage under tort and civil law
