Assets And The Poor New American Welfare Policy:

Assets and the Poor Michael Sherraden, 2016-09-16 This work proposes a new approach to welfare a social policy that goes beyond simple income maintenance to foster individual initiative and self sufficiency It argues for an asset based policy that would create a system of saving incentives through individual development accounts IDAs for specific purposes such as college education homeownership self employment and retirement security In this way low income Americans could gain the same opportunities that middle and upper income citizens have to plan ahead set aside savings and invest in a more secure future Asset Building and Low Income Families Signe-Mary McKernan, 2008-10-15 Low income families have scant

savings to cushion a job loss or illness and can find economic mobility impossible without funds to invest in education homes or businesses And though a lack of resources leaves such families vulnerable income support programs are often closed to those with a bit of savings or even a car Considering welfare to work reforms the increasingly advanced skill demands of the American workforce and our stretched Social Security system such an approach is inadequate to lift families out of poverty Asset based policies allowing or even helping low income families build wealth are an increasingly popular strategy to facilitate financial stability

Integrating the Inner City Robert J. Chaskin,Mark L. Joseph,2015-11-13 For many years Chicago s looming large scale housing projects defined the city and their demolition and redevelopment via the Chicago Housing Authority s Plan for Transformation has been perhaps the most startling change in the city s urban landscape in the last twenty years The Plan which reflects a broader policy effort to remake public housing in cities across the country seeks to deconcentrate poverty by transforming high poverty public housing complexes into mixed income developments and thereby integrating once isolated public housing residents into the social and economic fabric of the city But is the Plan an ambitious example of urban

regeneration or a not so veiled effort at gentrification In the most thorough examination of mixed income public housing redevelopment to date Robert J Chaskin and Mark L Joseph draw on five years of field research in depth interviews and volumes of data to demonstrate that while considerable progress has been made in transforming the complexes physically the integrationist goals of the policy have not been met They provide a highly textured investigation into what it takes to design finance build and populate a mixed income development and they illuminate the many challenges and limitations of the policy as a solution to urban poverty Timely and relevant Chaskin and Joseph s findings raise concerns about the increased privatization of housing for the poor while providing a wide range of recommendations for a better way forward
