Introduction

Reviewing a book of this caliber is a daunting task. R.M.W. Dixon (hereafter D) is a top scholar in the field of descriptive linguistics and language typology, who has made enormous contributions. Not only has he authored five major grammars (Dyirbal, Yidiñ, Fijian, English, Jarawara), several reference works on the languages of Australia and numerous articles on and sketches of Australian languages, but he has also produced various seminal works on typology (ergativity, adjectives, words, complementation among others), most of them co-edited with Alexandra Y. Aikhenvald. And this list leaves his work on music and his novels unmentioned. The three-volume series *Basic Linguistic Theory*, of which two volumes are reviewed here (volume 3 is scheduled to appear in 2011), can be viewed as the author's legacy after over forty very active and productive years in the field, a legacy in which he summarizes what he has discovered during these decades and wishes to pass on to the next generation of linguists. To a reviewer such as myself (who has some experience in grammar writing but none in typological research), the task feels like commenting on the seaworthiness and capacity of a huge ocean trawler while sitting on a self-built bamboo fishing raft. But at least we share a love for the ocean and a desire to catch fish!

In this review I will give a brief outline of the contents of the two volumes, followed by a list of distinctive features and recurrent motifs. This in turn is followed by an evaluation, in which I raise a number of critical questions. A word of warning is in order here. There is simply no way to do justice to the wealth of information and the new insights and perspectives offered in these two volumes. Especially for volume 2 (chapters 10-18), I just list the barest essentials, with considerable less detail than for volume 1.

Volume 1

In **Chapter 1 Basics** D lays out the focus and scope of these books. He sees linguistics as one of the natural sciences, the aims of which are to come to grips with empirical
