Burning Bush Stephen J. Pyne, 2015-09-14 Pyne traces the impact of fire in Australia from its influence on vegetation to its use by Aborigines and European settlers Mr Pyne showing what a historian deeply schooled in environmental science can contribute to our awareness of nature and culture has produced a provocative work that is a major contribution to the literature of environmental studies New York Times Book Review **George Perkins Marsh** David Lowenthal, 2009-11-23 George Perkins Marsh 1801 1882 was the first to reveal the menace of environmental misuse to explain its causes and to prescribe reforms David Lowenthal here offers fresh insights from new sources into Marsh's career and shows his relevance today in a book which has its roots in but wholly supersedes Lowenthal's earlier biography George Perkins Marsh Versatile Vermonter 1958 Marsh's devotion to the repair of nature to the concerns of working people to women's rights and to historical stewardship resonate more than ever His Vermont birthplace is now a national park chronicling American conservation and the crusade he launched is now global Marsh's seminal book *Man and Nature* is famed for its ecological acumen The clue to its inception lies in Marsh's many-sided engagement in the life of his time The broadest scholar of his day he was an acclaimed linguist lawyer congressman and renowned diplomat who served 25 years as U.S. envoy to Turkey and to Italy He helped found and guide the Smithsonian Institution shaped the Washington Monument penned potent tracts on fisheries and on irrigation spearheaded public science art and architecture He wrote on camels and corporate corruption Icelandic grammar and Alpine glaciers His pungent and provocative letters illuminate life on both sides of the Atlantic Like Darwin's *Origin of Species* Marsh's *Man and Nature* marked the inception of a truly modern way of looking at the world of taking care lest we irreversibly degrade the fabric of humanized nature we are bound to manage Marsh's ominous warnings inspired reforestation watershed management soil conservation and nature protection in his day and ours George Perkins Marsh Prophet of Conservation was awarded the Association for American Geographers 2000 J.B. Jackson Prize The book was also on the shortlist for the first British Academy Book Prize awarded in December 2001 The Ice Stephen J. Pyne, 2016-06-01 *The Ice* is a compilation of more about ice than you knew you wanted to know yet sheer compelling significance holds attention page by page Pyne conveys a view of Antarctica that interweaves physical science with humanistic inquiry and perception His audacity as well as his presentation warrant admiration for the implications of *The Ice* are vast New York Times Book Review Fire Stephen J. Pyne, 2019-08-12 Over vast expanses of time fire and humanity have interacted to expand the domain of each transforming the earth and what it means to be human In this concise yet wide-ranging book Stephen J. Pyne named by Science magazine as the world's leading authority on the history of fire explores the surprising dynamics of fire before humans fire and human origins aboriginal economies of hunting and foraging agricultural and pastoral uses of fire fire ceremonies fire as an idea and a technology and industrial fire In this revised and expanded edition Pyne looks to the future of fire as a constant defining presence on Earth A new chapter explores the importance of

fire in the twenty first century with special attention to its role in the Anthropocene or what he posits might equally be called the Pyrocene

Fire in America Stephen J. Pyne, 2017-01-27 From prehistory to the present day conservation movement Pyne explores the efforts of successive American cultures to master wildfire and to use it to shape the landscape

The Dawn of Conservation Diplomacy Kurkpatrick Dorsey, 2009-11-17 In the first decades of the twentieth century fish in the Great Lakes and Puget Sound seals in the North Pacific and birds across North America faced a common threat over harvesting that threatened extinction for many species Progressive era conservationists saw a need for government intervention to protect threatened animals And because so many species migrated across international political boundaries their protectors saw the necessity of international conservation agreements In *The Dawn of Conservation Diplomacy* Kurkpatrick Dorsey examines the first three comprehensive wildlife conservation treaties in history all between the United States and Canada the Inland Fisheries Treaty of 1908 the North Pacific Fur Seal Convention of 1911 and the Migratory Bird Treaty of 1916 In his highly readable text Dorsey argues that successful conservation treaties came only after conservationists learned to marshal scientific evidence public sentiment and economic incentives in their campaigns for protective legislation The first treaty intended to rescue the overfished boundary waters failed to gain the necessary support and never became law Despite scientific evidence of the need for conservation politicians and the general public were unable to counter the vocal opposition of fishermen across the continent A few years later conservationists successfully rallied popular sympathy for fur seals threatened with slaughter and the North Pacific Fur Seal Convention was adopted By the time of the Migratory Bird Treaty of 1916 the importance of aesthetic appeal was clear North American citizens were joining chapters of the Audubon Society in efforts to protect beautiful songbirds Conservationists also presented economic evidence to support their efforts as they argued that threatened bird species provided invaluable service to farmers Dorsey recounts the story of each of these early treaties examining the scientific research that provided the basis for each effort acknowledging the complexity of the issues and presenting the personalities behind the politics He argues that these decades old treaties both directly affect us today and offer lessons for future conservation efforts

Vestal Fire Stephen J. Pyne, 2012-04-01 Stephen Pyne has been described as having a consciousness composed of equal parts historian ecologist philosopher critic poet and sociologist At this time in history when many people are trying to understand their true relationship with the natural environment this book offers a remarkable contribution breathtaking in the scope of its research and exhilarating to read Pyne takes the reader on a journey through time exploring the terrain of Europe and the uses and abuses of its lands as well as through migration and conquest many parts of the rest of the world Whether he is discussing the Mediterranean region Russia Scandinavia the British Isles central Europe or colonized islands whether he is considering the impact of agriculture forestry or Enlightenment thinking the author brings an unmatched insight to his subject *Vestal Fire* takes its title from Vesta Roman goddess of the hearth and keeper of the sacred fire on Mount Olympus But the book s

title also suggests the strengths and limitations of Europe's peculiar conception of fire and through fire of its relationship to nature. Between the untamed fire of the wilderness and the tended fire of the hearth lies a never ending dialectic in which human beings struggle to control natural forces and processes that in fact can sometimes be directed but never wholly dominated or contained.

World Fire Stephen J. Pyne, 2014-07-01. Back in Print. World Fire is the story of how fire and humans have coevolved. The two are inseparable and together they have repeatedly remade the planet. Pyne considers the evolution of fire in such diverse regions as Australia, Africa, Brazil, Sweden, Greece, Iberia, Russia, and India, and then ponders Antarctica, the land without fire. As he examines changing techniques for and attitudes toward fire control, Pyne challenges our concepts of nature and wilderness and explains why the study and management of fire have tremendous environmental, cultural, and political implications. Booklist. A sweeping historical treatise that examines our world's love-hate relationship with conflagration. His engrossing ideas leave bright embers in the memory.

Outside: The Rhine Mark Cioc, 2009-11-17. The Rhine River is Europe's most important commercial waterway, channeling the flow of trade among Switzerland, France, Germany, and the Netherlands. In this innovative study, Mark Cioc focuses on the river from the moment when the Congress of Vienna established a multinational commission charged with making the river more efficient for purposes of trade and commerce in 1815. He examines the engineering and administrative decisions of the next century and a half that resulted in rapid industrial growth as well as profound environmental degradation and highlights the partially successful restoration efforts undertaken from the 1970s to the present. The Rhine is a classic example of a multipurpose river used simultaneously for transportation for industry and agriculture, for urban drinking and sanitation needs, for hydroelectric production, and for recreation. It thus invites comparison with similarly overburdened rivers such as the Mississippi, Hudson, Colorado, and Columbia. The Rhine's environmental problems are however even greater than those of other rivers because it is so densely populated: 50 million people live along its borders, so highly industrialized: 10% of global chemical production, and so short: 775 miles in length. Two centuries of nonstop hydraulic tinkering have resulted in a Rhine with a sleek and slender profile. In their quest for a perfect canal-like river, engineers have modified it more than any other large river in the world. As a consequence, between 1815 and 1975, the river lost most of its natural floodplain, riverside vegetation, migratory fish, and biodiversity. Recent efforts to restore that biodiversity, though heartening, can have only limited success because so many of the structural changes to the river are irreversible. **The Rhine: An Eco Biography 1815-2000** makes clear just how central the river has been to all aspects of European political, economic, and environmental life for the past two hundred years.

Where Land and Water Meet Nancy Langston, 2009-11-23. Water and land interrelate in surprising and ambiguous ways, and riparian zones where land and water meet have effects far outside their boundaries. Using the Malheur Basin in southeastern Oregon as a case study, this intriguing and nuanced book explores the ways people have envisioned boundaries between water and land, the ways they have altered these places, and the often unintended results. The Malheur Basin, once home to the largest cattle

empires in the world experienced unintended widespread environmental degradation in the late nineteenth and early twentieth centuries After establishment in 1908 of Malheur National Wildlife Refuge as a protected breeding ground for migratory birds and its expansion in the 1930s and 1940s the area experienced equally extreme intended modifications aimed at restoring riparian habitat Refuge managers ditched wetlands channelized rivers applied Agent Orange and rotenone to waterways killed beaver and cut down willows Where Land and Water Meet examines the reasoning behind and effects of these interventions gleaning lessons from their successes and failures Although remote and specific the Malheur Basin has myriad ecological and political connections to much larger places This detailed look at one tangled history of riparian restoration shows how through appreciation of the complexity of environmental and social influences on land use and through effective handling of conflict people can learn to practice a style of pragmatic adaptive resource management that avoids rigid adherence to single agendas and fosters improved relationships with the land

Embracing the Tune of Appearance: An Mental Symphony within **Burning Bush A Fire History Of Australia Weyerhaeuser Environmental Books**

In a world taken by displays and the ceaseless chatter of quick conversation, the melodic splendor and mental symphony developed by the prepared word frequently diminish into the back ground, eclipsed by the relentless noise and disturbances that permeate our lives.
