

INTRODUCTION

- Introduction

- Insects comprise approximately 75% of known animal species and are the most diverse group of animals
 - More than a million insect species have been described and as many as eight million may await discovery
 - They represent more than half of all known living organisms
- Insects have a chitinous exoskeleton, a three-part body (head, thorax and abdomen), three pairs of jointed legs, compound eyes, and one pair of antennae
- While many insects are beneficial, many others inflict harm to plants, animals, and humans
