

BIOL 107 Lab 1 Assignment sheet - The Scientific Method and the Metric System

The scientific method

1. (2 pts) You grow tomato plants but you notice that your neighbor's tomato plants are big and healthy with lots of delicious-looking tomatoes while yours are small and sickly. You know that your neighbor fertilizes their plants regularly whereas you never fertilize. Propose a testable hypothesis regarding tomato plant growth and the use of fertilizer. Briefly describe an experiment to test this hypothesis. Be sure to name independent and dependent variables and include any control variables.

The scientific method begins with the observation that there is a difference between my tomatoes and my neighbor's tomatoes size. I would then question as to why there is a difference and come up with the hypothesis that, is it the possibility that not utilizing fertilizer negatively affects the health and size of the fertilizer. Hypothesis: If I use fertilizer, then my tomatoes will be healthier in terms of size and looks. Independent variable: the type and quantity of fertilizer, sunlight, and water used. Dependent variable, the growth of tomato plant.
