

Biology 13A Lab #13: Nutrition and Digestion

Lab #13 Table of Contents:

• Expected Learning Outcomes	102
• Introduction	103
• Food Chemistry & Nutrition	104
• Activity 1: Testing for the Presence of Nutrients	104
• Activity 2: The Digestive System and Digestion	111

Expected Learning Outcomes

At the end of this lab, you will be able to

- list the essential nutrients found in food;
- describe the basic chemical composition of carbohydrates, proteins, fats, and vitamins;
- identify nutrient content in foods and test for nutrients in unknown samples;
- learn the parts of the digestive system;
- explain functions of major nutrients in the body.

Biology 13a Lab Manual

TD Snyder

Biology 13a Lab Manual:

Molecular Biology Techniques Susan Carson, Heather B. Miller, Sue Carson, D. Scott Witherow, 2011-11-07 This manual is an indispensable tool for introducing advanced undergraduates and beginning graduate students to the techniques of recombinant DNA technology or gene cloning and expression. The techniques used in basic research and biotechnology laboratories are covered in detail. Students gain hands-on experience from start to finish in subcloning a gene into an expression vector through purification of the recombinant protein. The third edition has been completely rewritten with new laboratory exercises and all new illustrations and text designed for a typical 15-week semester rather than a 4-week intensive course. The project approach to experiments was maintained; students still follow a cloning project through to completion, culminating in the purification of recombinant protein. It takes advantage of the enhanced green fluorescent protein; students can actually visualize positive clones following IPTG induction. Cover basic concepts and techniques used in molecular biology research labs. Student-tested labs proven successful in a real classroom laboratory. Exercises simulate a cloning project that would be performed in a real research lab. Project approach to experiments gives students an overview of the entire process. Prep list appendix contains necessary recipes and catalog numbers providing staff with detailed instructions. *Molecular Biology Techniques* Sue Carson, Heather B. Miller, Melissa C. Srougi, D. Scott Witherow, 2019-03-05

Molecular Biology Techniques: A Classroom Laboratory Manual Fourth Edition is a must-have collection of methods and procedures on how to create a single continuous comprehensive project that teaches students basic molecular techniques. It is an indispensable tool for introducing advanced undergraduates and beginning graduate students to the techniques of recombinant DNA technology or gene cloning and expression. The techniques used in basic research and biotechnology laboratories are covered in detail. Students will gain hands-on experience on subcloning a gene into an expression vector straight through to the purification of the recombinant protein. Presents student-tested labs proven successful in real classroom laboratories. Includes a test bank on a companion website for additional testing and practice. Provides exercises that simulate a cloning project that would be performed in a real research lab. Includes a prep list appendix that contains necessary recipes and catalog numbers providing staff with detailed instructions. [A Manual of Laboratory Experiences in Cell Biology](#) C.
