

Thank you for using Brainworx plug-ins.

bx_saturator V2

The bx_saturator V2 is an M/S & multi-band saturation tool which can be used for mastering, mixing and sound design. From easy glue to heavy crunch, you choose. The V2 update offers improved crossover technology and less aliasing.

The bx_saturator V2 plug-in offers a warm and subtle distortion which can be applied to individual signals of a mix or even the stereo master channel using our new *True-Split* crossover technology that ensures Mid & Side channels are perfectly in phase.

The bx_saturator V2 belongs to the Brainworx Rock'n'Roll line of creative plug-ins. Technical excellence for the creative musician and engineer. Although we offer a mono version of the plug-in, we consider the stereo M/S plug-in to be the main version, as it enables you to thicken and boost any stereo signal, bus or mix in a more nuanced way than ever.

Increase the perceived volume of mixes without clipping them, or bring out delicate signals like acoustic guitars and percussion in full mixes without increasing their actual level or eq-ing them in a harsh and offensive way. Distort vocals in full mixes without losing the punch of your drums or the clarity of your keyboard sounds and stereo guitars. Fatten and distort Mid and Side signals independently - and separately for high and low frequencies.

Natural sound – in your face.

We believe that the plug-in layout almost speaks for itself, so we have kept this manual as short as possible. Please read it though. Understanding the main features will help you get the best out of it.
