Renewable Resources for Surface Coatings, Inks and Adhesives Rainer Höfer, 2022-11-11 Providing a detailed survey of renewable raw materials for paints inks and glues this book is ideal for researchers and practitioners working in the areas of green chemistry industrial chemistry and sustainability Beginning with a brief history of coatings and adhesives this book walks the reader through the chemistry properties sourcing and processing of a number of renewable raw materials including lipids natural resins proteins and carbohydrates Their use in a range of recent developments and concepts from material protection to decorative paints and coatings adhesives and sealants is highlighted providing the reader with a complete and modern foundation to the field

Food Bioactives Munish Puri, 2017-04-07 This book focuses on various types of bioactive compounds including secondary metabolites oligosaccharides polysaccharides flavonoids peptides proteins carotenoid pigments quinones terpenes and polyunsaturated fatty acids and presents an overview of their nutraceutical activities It covers the current status and future potential of food compounds as well as extraction technologies for bioactives derived from plant fungi and marine derived bioactive agents Finally health promoting effects of plant fungi and marine derived bioactive agents are discussed Chapters come from top researchers in this area from around the globe The volume caters to the needs of undergraduate and post graduate students in the area of food biotechnology food bioprocessing biotechnology food engineering etc and also contains information pertinent to researchers

Blue Biotechnology Stephane La Barre, Stephen S. Bates, 2018-09-06 With its integral treatment of ecosystem and resource management this is the only overview of the field to address current thinking and future trends All contributions have been written with the novice in mind explaining the basics and highlighting recent developments and achievements Unmatched in scope this two volume reference covers both traditional and well established areas of marine biotechnology such as biomass production alongside such novel ones as biofuels biological protection of structures and bioinspired materials In so doing it ties together information usually only found in widely dispersed sources to assemble a grand unified view of the current state of and prospects for this multi faceted discipline The combination of the breadth of topics and the focus on modern ideas make this introductory book especially suitable for teaching purposes and for guiding newcomers to the many possibilities offered by this booming field

Biological Adhesives Andrew M. Smith, 2016-10-22 Many creatures use adhesive polymers and structures to attach to inert substrates to each other or to other organisms This is the first major review that brings together research on many of the well known biological adhesives dealing with bacteria fungi algae and marine and terrestrial animals

As we learn more about their molecular and mechanical properties we begin to understand why they adhere so well and with this comes broad applications in areas such as medicine dentistry and biotechnology *Selected Proceedings from the 231st ECS Meeting*
