

HET LEVEN IN ÉÉN DAG

De aarde vormde zich ongeveer 4,5 miljard jaar geleden toen de materie die overbleef bij het ontstaan van de zon met elkaar in aanraking kwam en samenklonnen. Daarna maakte onze planeet ongelofelijke veranderingen door, waaronder het ontstaan van de maan, de vorming van de oceanen en natuurlijk de evolutie van het leven. Maar wat als de geschiedenis van de aarde in één dag geïmpet kon worden – hoe zou die dag er dan uit zien?

In de eerste uren van de dag krijgt onze planeet te maken met vulkaanuitbarstingen en neerstortende meteorieten. De aarde is dan nog heet en neemt de tijd om af te koelen. De eerste levensvorm stiekt rond 3.45 zijn kop op, in de vorm van

eenreuzige ingetruwen genaamd prokaryoten.

Twee uur later smelt een prokaryoot samen met een andere en vormen ze samen de eerste cellen met een celkern, waardoor eukaryoten tot leven komen. Een paar uur later, rond 10.25, groeperen de cellen zich en beginnen ze samen te werken. De eerste meercellige levensvormen ontstaan en maken de weg vrij voor het scala dat we nu kennen. Het ontstaan van onze soort, de homo sapiens, vormt slechts een ogenblik op een drukke dag. De hele geschiedenis van de mensheid past in enkele seconden en een mensaleven is zo kortstondig dat het in een dag nauwelijks valt waar te nemen.

Light Pollution Handbook Kohei Narisada, Duco Schreuder, 2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors Vision and Visual Perception Duco A. Schreuder, 2014-12-03 Vision is about insight and visual perception is about cognition and they form the foundation of how we see the world Duco A Schreuder a physicist and psychologist explores the finer details of each in this groundbreaking book that explores human consciousness and perception Sharing virtually everything he s learned over a varied career spanning more than sixty years he examines a wide array of topics including how we understand what we visually process how we store and retrieve information the role that neurons play in how what we see and much more While Schreuder isn t afraid to disagree with other leading thinkers he relies on science and focuses on the facts behind it so you can understand lighting visual perception engineering design and applied and experimental physics Looking is about insight whereas seeing is about knowledge and you need to know how each one works to truly understand how humanity views the world Whether you re an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline you ll be well served by taking a closer look at Vision and Visual Perception **Biologische klok** ,1992
