A Question Of Time An Alternative Cast Of Mind:

On Human Temporality Michael Eldred, 2024-04-01 Eldred offers a remedy to the consequences of ancient Greek misconceptions of time that are also entrenched in today's mathematized physics. Here time is spatialized as the one dimensionally linear arrow of time for the sake of predicting and controlling movement. But such spatialized time distorts the phenomenon of time itself. An alternative hermeneutic phenomenological path begins with a pre-spatial concept of time that is genuinely three-dimensional. This paves the way for recasting who we are as humans in belonging first of all to the free openness of 3D temporality. This belonging enables temporally 3D vision of the psyche that empowers us to see movement at all and reconcile its inherent contradictoriness. We are then also able to conceive ourselves no longer merely as internally cogitating self-conscious subjects but as engaged existentially in temporally 3D interplay mutually estimating and esteeming who we are. This unpredictable interplay is constrained however by being played out in the sociating medium of thingified value. The accumulative movement of thingified value having gained the upper hand in dictating our life movements as well as our interplay with the earth.

Social Ontology of Whoness Michael Eldred, 2018-10-26 How are core social phenomena to be understood as modes of being? This book offers an alternative approach to social ontology. Recent interest in social ontology on the part of mainstream philosophy and the social sciences presupposes from the outset that the human being can be cast as a conscious subject whose intentionality can be collective. By contrast, the present study insistently poses the crucial question of who the human being is and how they sociate as whos. Such whoness is a clean-cut departure from the venerable tradition of questioning whatness/quidditas/essence in philosophical thinking. Casting human being hermeneutically as whoness opens up new insights into how human beings sociate in interplays of mutual estimation that are simultaneously social power plays. Hitherto the ontology of social power in all its various guises has only ever been implicit. This book makes it explicit. The kind of social power prevalent in capitalist societies is that of the reified value embodied in commodities: money, capital, etc. Reified value itself is constituted through an interplay of mutual estimation among things that reflects back on the power interplay among whos. In this way a new critique of capitalism becomes possible.

A Question of Time Michael Eldred, 2015-06-27 The question of time is a question of time. How long will it take for the question concerning time to become THE question of our time? That neither you nor I know. Today the question is still being evaded as if it had been settled for all time already by Aristotle. Modern science, even today's most advanced quantum physics, despite eschewing Aristotle as superseded, nevertheless remains true to his conception of linear numeric time. It doesn't want to touch the question for fear of losing control over time as a mathematizable physical variable. But is time physical? The guiding thesis of the present collection of essays is that it is not but neither is it a formal construct inside subjective consciousness. Therein lies the subversive adventurousness of the study, which is the philosophical companion to *The Land of Matta* 2015.

Movement and Time in the Cyberworld Michael Eldred, 2019-05-06 The cyberworld is fast rolling in and impacting every

aspect of human living on the globe today presents an enormous challenge to humankind It is taken up by the media following current events through to all kinds of natural and social scientific discourses Digitized technoscience develops at a breakneck pace in all areas accompanied by sociological analysis What is missing is a philosophical response genuinely posing the basic ontological question What is a digital being's peculiar mode of being The present study offers a digital ontology that analyzes the dissolution of beings into bit strings driven by mathematized science The mathematization of knowledge reaches back to Pythagoras Plato and Aristotle and continues with Descartes Galileo Newton Leibniz Western knowledge from its inception has always been driven by an unbridled will to efficient causal power over all kinds of movement and change This historical trajectory culminates in the universal Turing machine that enables efficient automated algorithmic control over the movement of digital beings through the cyberworld The book fills in the ontological foundations underpinning this brave new cyberworld and interrogates them especially by questioning the millennia old conception of 1D linear time An alternative ontology of movement arises based on a radically alternative conception of 3D time

The Ancient World in Alternative History and Counterfactual Fictions Alberto J. Quiroga Puertas, Leire

Olabarria, 2024-08-22 Focusing in turn on history powerful individuals under represented voices and the arts the essays in this collection cover a wide variety of modern and contemporary narrative fiction from Jo Walton and L Sprague De Camp to T S Chaudhry and Catherynne M Valente Chapters look into the question of chance versus determinism in the unfolding of historical events the role individuals play in shaping a society or occasion and the way art and literature symbolise important messages in counterfactual histories They also show how uchronic narratives can take advantage of modern literary techniques to reveal new and relevant aspects of the past giving voices to marginalised minorities and suppressed individuals of the ancient world Counterfactual fiction and uchronic narratives have been largely up until now the domain of literary critics However these modes of literature are here analysed by scholars of Ancient History Egyptology and Classics shedding important new light on how cultures of the ancient world have been and still are perceived and to what extent our conceptions of the past are used to explore alternate presents and futures Alternate history entices the imagination of the public by suggesting hypothetical scenarios that never occurred underlining a latent tension between reality and imagination and between determinism and contingency This interest has resulted in a growing number of publications that gauge the impact of what if narratives and this one is the first to give scholars of the ancient world centre stage

Time in Contemporary Intellectual Thought P.J.N. Baert, 1999-12-09 In this book fifteen authors from a wide spectrum of disciplines ranging from the natural sciences to the arts offer assessments of the way time enters their work the definition and uses of time that have proved most productive or problematic and the lessons their subjects can offer for our understanding of time beyond the classroom and laboratory walls The authors have tried without sacrificing analytical rigour to make their contribution accessible to a cross disciplinary readership Each chapter reviews time's past and present application in its

respective field considers the practical and logical problems that remain and assesses the methods researchers are using to escape or resolve them Particular attention is paid to ways in which the technical treatment of time for problem solving and model building around specific phenomena call on or clash with our intuitive perceptions of what time is and does The spans of time considered range from the fractions of seconds it takes unstable particles to disintegrate to the millions of years required for one species to give way to another Like all central conceptual words time is understood on several levels By inviting input from a broad range of disciplines the book aims to provide a fuller understanding of those levels and of the common ground that lurks at their base Much agreement emerges not only on the nature of the problems time presents to modern intellectual thought but also on the clues that recent discoveries may offer towards possible solutions *Inside the Mind of a Voter* Michael Bruter, Sarah Harrison, 2025-06-17 An in depth look into the psychology of voters around the world how voters shape elections and how elections transform citizens and affect their lives Could understanding whether elections make people happy and bring them closure matter more than who they vote for What if people did not vote for what they want but for what they believe is right based on roles they implicitly assume Do elections make people cry This book invites readers on a unique journey inside the mind of a voter using unprecedented data from the United States the United Kingdom Germany France South Africa and Georgia throughout a period when the world evolved from the centrist dominance of Obama and Mandela to the shock victories of Brexit and Trump Michael Bruter and Sarah Harrison explore three interrelated aspects of the heart and mind of voters the psychological bases of their behavior how they experience elections and the emotions this entails and how and when elections bring democratic resolution The authors examine unique concepts including electoral identity atmosphere ergonomics and hostility From filming the shadow of voters in the polling booth to panel study surveys election diaries and interviews Bruter and Harrison unveil insights into the conscious and subconscious sides of citizens psychology throughout a unique decade for electoral democracy They highlight how citizens personality memory and identity affect their vote and experience of elections when elections generate hope or hopelessness and how subtle differences in electoral arrangements interact with voters psychology to trigger different emotions *Inside the Mind of a Voter* radically shifts electoral science moving away from implicitly institution centric visions of behavior to understand elections from the point of view of voters **Geographic Thought** George L. Henderson, Marvin Waterstone, 2009 This unabridged reader offers a fresh approach to learning about Geographic Thought by showing through concrete examples and detailed editorial essays how the discipline has been forever altered by the rise of progressive social struggles of the last 30 years *Blake 2.0* Steve Clark, T. Connolly, 2012-01-24 Blake said of his works Tho I call them Mine I know they are not Mine So who owns Blake Blake has always been more than words on a page This volume takes Blake 2 0 as an interactive concept examining digital dissemination of his works and reinvention by artists writers musicians and filmmakers across a variety of twentieth century media *And The Walls Came Tumbling Down* Debbie McGowan, 2016-08-01 This is the natural
