Scherpbier,Cees P.M. van der Vleuten,J.J. Rethans,A.F.W. van der Steeg,2012-12-06 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht We received 525 abstracts for the conference divided in thematic poster sessions and platform presentations Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences During and after the conference about 250

papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression. Despite the large number of papers the editors have attempted to review and edit the papers as carefully as possible. Occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo Berger whose expertise with desk top publishing and perseverance was a great help.

Oxford Handbook of Pre-hospital Care Ian Greaves, Sir Keith Porter, 2021-01-19 Fully updated for a second edition the Oxford Handbook of Pre hospital Care is the invaluable guide to providing high quality care in a pre hospital environment. Evidence based and reflecting new developments in regulation and practice this second edition is designed to provide key information for all immediate care practitioners including doctors paramedics emergency medical technicians and community responders. The text has been cross referenced with the Joint Royal Colleges Ambulance Liaison Committee JRCALC handbook to ensure full clinical relevance. Reflecting the major advances in delivery of pre hospital care including the greater survival benefits for heart attacks and major trauma when delivering patients directly to higher levels of care the evolution of the paramedic role into critical care paramedics roadside rapid sequence induction of anaesthesia and the introduction of mechanical chest compression devices this new edition is the ideal companion for those involved in delivering pre hospital care. It also links to relevant online databases and mobile apps that can assist with calculations and contains key algorithms and formulae to ensure good care. The Oxford Handbook of Pre hospital Care is the comprehensive quick reference guide to all medical and trauma conditions regularly encountered in the immediate care setting.

Manual of Simulation in Healthcare Richard H. Riley, 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical nursing and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and

experienced workers in the field to learn from established practitioners in medical simulation Simulation has been used to enhance the educational experience in a diverse range of fields therefore a wide variety of disciplines are represented The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development and promotion Section two deals with simulators and related training devices that are required to equip a stand alone or institution based centre The features strengths and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements There is a guide to producing scenarios and medical props that can enhance the training experience The third section covers adult education and it reviews the steps required to develop courses that comply with best practice in medical education Teaching skills facilitating problem based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education The manual concludes with guides for the major specialties that use simulation including military paediatrics CPR and medical response teams obstetrics and anesthesia
