Advanced Managerial Accounting Solutions Manual:

Instructor's Resource Manual for Advanced Managerial Accounting (including Suggested Solutions) Robert Paul Magee, 1986 Managerial Accounting Ramji Balakrishnan, Konduru Sivaramakrishnan, Geoffrey B. Sprinkle, 2008-11-10

Most managerial accounting texts emphasize the mechanics of managerial accounting. While important mechanics are not enough, to solve business problems students need to understand how managerial accounting can improve decision making and when and where a particular tool or technique is appropriate. Balakrishnan's *Managerial Accounting* 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information, students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

Managerial Accounting Michael Maher, Clyde P. Stickney, Roman L. Weil, 2006. This classic text for MBA programs offers balanced coverage of concepts, methods, and uses of managerial accounting with an increasingly strong emphasis on management decision making. This approach helps focus on concepts and managerial uses of financial information rather than techniques of cost accounting. The current edition emphasizes international issues, strategic effects of decisions, ethics, and new management accounting trends. Also emphasized are process improvement, integration of financial reporting issues for management decision making, and application of managerial accounting tools to the emerging service sector, government, and nonprofits in examples and problem material.
