Consider two grading systems for determining your final class average. Each system is a weighted average of measures that include test grades, final exam grade, homework, and class participation.

Grading System I	Grading System II
Test average – 40%	Test average – 60
Final Exam Grade – 25%	Final Exam Grade – 15%
Homework – 25%	Homework – 15%
Class Participation – 10%	Class Participation – 10%

- If your values are the following, which grading system do you prefer and why?
 - Test average = 84
 - Final exam grade = 68
 - Homework = 90
 - Class participation = 95
- If you score 10 points higher on the final exam, how does your final grade average change under each system?
