Advanced Image Processing Techniques For Remotely Sensed Hyperspectral Data:

Advanced Image Processing Techniques for Remotely Sensed Hyperspectral Data Pramod K. Varshney, Manoj K. Arora, 2013-03-09 The first of its kind this book reviews image processing tools and techniques including Independent Component Analysis Mutual Information Markov Random Field Models and Support Vector Machines The book also explores a number of experimental examples based on a variety of remote sensors The book will be useful to people involved in hyperspectral imaging research as well as by remote sensing data like geologists hydrologists environmental scientists civil engineers and computer scientists

Advanced Image Processing Techniques for Remotely Sensed Hyperspectral Data Pramod K. Varshney, Manoj K. Arora, 2004-08-12 The first of its kind this book reviews image processing tools and techniques including Independent Component Analysis Mutual Information Markov Random Field Models and Support Vector Machines The book also explores a number of experimental examples based on a variety of remote sensors The book will be useful to people involved in hyperspectral imaging research as well as by remote sensing data like geologists hydrologists environmental scientists civil engineers and computer scientists

Soft Computing in Image Processing Mike Nachtgael, Dietrich van der Weken, Etienne E. Kerre, Wilfried Philips, 2007-06-24 Images have always been very important in human life Their applications range from primitive communication between humans of all ages to advanced technologies in the industrial medical and military field The increased possibilities to capture and analyze images have contributed to the largeness that the scientific field of image processing has become today Many techniques are being applied including soft computing Soft Computing in Image Processing Recent Advances follows the edited volumes Fuzzy Techniques in Image Processing volume 52 published in 2000 and Fuzzy Filters for Image Processing volume 122 published in 2003 and covers a wide range of both practical and theoretical applications of soft computing in image processing The 16 excellent chapters of the book have been grouped into five parts Applications in Remote Sensing Applications in Image Retrieval Applications in Image Analysis Other Applications and Theoretical Contributions The focus of the book is on practical applications which makes it interesting for every researcher that is involved with soft computing image processing or both scientific branches

Advances and Challenges in Multisensor Data and Information Processing Eric Lefebvre, 2007-05-15 Information fusion resulting from multi source processing often called multisensor data fusion when sensors are the main sources of information is a relatively young less than 20 years technology domain It provides techniques and methods for Integrating data from multiple sources and using the complementarity of this data to derive maximum information about the phenomenon being observed Analyzing and deriving the meaning of these observations Selecting the best course of action and Controlling the actions Various sensors have been designed to detect some specific phenomena but not others Data fusion applications can combine synergically information from many sensors including data provided by satellites and contextual and encyclopedic knowledge to provide enhanced ability to detect and recognize anomalies in the environment

compared with conventional means Data fusion is an integral part of multisensor processing but it can also be applied to fuse non sensor information geopolitical intelligence etc to provide decision support for a timely and effective situation and threat assessment One special field of application for data fusion is satellite imagery which can provide extensive information over a wide area of the electromagnetic spectrum using several types of sensors Visible Infra Red IR Thermal IR Radar Synthetic Aperture Radar SAR Polarimetric SAR PolSAR Hyperspectral Satellite imagery provides the coverage rate needed to identify and monitor human activities from agricultural practices land use crop types identification to defence related surveillance land sea target detection and classification By acquiring remotely sensed imagery over earth regions that land sensors cannot access valuable information can be gathered for the defence against terrorism This books deals with the following research areas Target recognition classification and tracking Sensor systems Image processing Remote sensing and remote control Belief functions theory and Situation assessment

Recent Advances in Knowledge-based Paradigms and Applications Jeffrey W. Tweedale, Lakhmi C. Jain, 2013-10-30 This book presents carefully selected contributions devoted to the modern perspective of AI research and innovation This collection covers several areas of applications and motivates new research directions The theme across all chapters combines several domains of AI research Computational Intelligence and Machine Intelligence including an introduction to the recent research and models Each of the subsequent chapters reveals leading edge research and innovative solution that employ AI techniques with an applied perspective The problems include classification of spatial images early smoke detection in outdoor space from video images emergent segmentation from image analysis intensity modification in images multi agent modeling and analysis of stress They all are novel pieces of work and demonstrate how AI research contributes to solutions for difficult real world problems that benefit the research community industry and society

Optical Remote Sensing Saurabh Prasad, Lori M. Bruce, Jocelyn Chanussot, 2011-03-23 Optical remote sensing relies on exploiting multispectral and hyper spectral imagery possessing high spatial and spectral resolutions respectively These modalities although useful for most remote sensing tasks often present challenges that must be addressed for their effective exploitation This book presents current state of the art algorithms that address the following key challenges encountered in representation and analysis of such optical remotely sensed data Challenges in pre processing images storing and representing high dimensional data fusing different sensor modalities pattern classification and target recognition visualization of high dimensional imagery

Advanced Concepts for Intelligent Vision Systems Jaques Blanc-Talon, Wilfried Philips, Dan Popescu, Paul Scheunders, Pavel Zemcik, 2012-09-02 This book constitutes the thoroughly refereed proceedings of the 14th International Conference on Advanced Concepts for Intelligent Vision Systems ACIVS 2012 held in Brno Czech Republic in September 2012 The 46 revised full papers were carefully selected from 81 submissions and deal with image analysis and computer vision with a focus on detection recognition tracking and identification , Cloud Computing for Geospatial Big Data Analytics Himansu Das, Rabindra K. Barik, Harishchandra Dubey, Diptendu Sinha

Roy,2018-12-11 This book introduces the latest research findings in cloud edge fog and mist computing and their applications in various fields using geospatial data It solves a number of problems of cloud computing and big data such as scheduling security issues using different techniques which researchers from industry and academia have been attempting to solve in virtual environments Some of these problems are of an intractable nature and so efficient technologies like fog edge and mist computing play an important role in addressing these issues By exploring emerging advances in cloud computing and big data analytics and their engineering applications the book enables researchers to understand the mechanisms needed to implement cloud edge fog and mist computing in their own endeavours and motivates them to examine their own research findings and developments

Hyperspectral Remote Sensing Ruiliang Pu,2017-08-16 Advanced imaging spectral technology and hyperspectral analysis techniques for multiple applications are the key features of the book This book will present in one volume complete solutions from concepts fundamentals and methods of acquisition of hyperspectral data to analyses and applications of the data in a very coherent manner It will help readers to fully understand basic theories of HRS how to utilize various field spectrometers and bioinstruments the importance of radiometric correction and atmospheric correction the use of analysis tools and software and determine what to do with HRS technology and data
