It is designed for R programmers who want to deepen their understanding of the language and programmers experienced in other languages who want to understand what makes R different and special. This book will teach you the foundations of R: three fundamental programming paradigms: functional, object-oriented, and metaprogramming; and powerful techniques for debugging and optimising your code. By reading this book, you will learn: The difference between an object and its name and why the distinction is important; The important vector data structures, how they fit together, and how you can pull them apart using subsetting; The fine details of functions and environments; The condition system which powers messages, warnings, and errors; The powerful functional programming paradigm which can replace many for loops; The three most important OO systems: S3, S4, and R6; The tidy eval toolkit for metaprogramming which allows you to manipulate code and control evaluation; Effective debugging techniques that you can deploy regardless of how your code is run; How to find and remove performance bottlenecks. The second edition is a comprehensive update. New foundational chapters: Names and values; Control flow and Conditions; comprehensive coverage of object-oriented programming with chapters on S3, S4, R6 and how to choose between them; Much deeper coverage of metaprogramming including the new tidy evaluation framework; use of new package like rlang, http, rlang, r-lib.org which provides a clean interface to low-level operations and purrr, http, purrr, tidyverse.org for functional programming; Use of color in code chunks and figures. Hadley Wickham is Chief Scientist at RStudio, an Adjunct Professor at Stanford University and the University of Auckland, and a member of the R Foundation. He is the lead developer of the tidyverse, a collection of R packages including ggplot2 and dplyr, designed to support data science. He is also the author of R for Data Science with Garrett Grolemund, R Packages and ggplot2: Elegant Graphics for Data Analysis.
