D. Munns,2017-07-19 Promising an end to global hunger and political instability huge climate controlled laboratories known as phytotrons spread around the world to thirty countries after the Second World War The United States built nearly a dozen including the first at Caltech in 1949 Made possible by computers and other novel greenhouse technologies of the early Cold War phytotrons enabled plant scientists to experiment on the environmental causes of growth and development of living organisms Subsequently they turned biologists into technologists who in their pursuit of knowledge about plants also set out to master the machines that controlled their environment *Engineering the Environment* tells the forgotten story of a research program that revealed the shape of the environment the limits of growth and development and the limits of human control over complex technological systems As support and funding for basic science dwindled in the mid 1960s phytotrons declined and ultimately disappeared until nearly thirty years later the British built the Ecotron to study the impact of climate change on biological communities By revisiting this history of phytotrons David Munns reminds us of the vital role they can play in helping researchers unravel the complexities of natural ecosystems in the Anthropocene **Germany and 'The West'** Riccardo Bavaj,Martina Steber,2015-04-01 The West is a central idea in German public discourse yet historians know surprisingly little about the evolution of the concept Contrary to common assumptions this volume argues that the German concept of the West was not born in the twentieth century but can be traced from a much earlier time In the nineteenth century the West became associated with notions of progress liberty civilization and modernity It signified the future through the opposition to antonyms such as Russia and the East and was deployed as a tool for forging German identities Examining the shifting meanings political uses and transnational circulations of the idea of the West sheds new light on German intellectual history from the post Napoleonic era to the Cold War
