Half-Life Frank Close, 2015-02-03 It was at the height of the Cold War in the summer of 1950 when Bruno Pontecorvo mysteriously vanished behind the Iron Curtain Who was he and what caused him to disappear Was he simply a physicist or also a spy and communist radical A protege of Enrico Fermi Pontecorvo was one of the most promising nuclear physicists in the world He spent years hunting for the Higgs boson of his day the neutrino a nearly massless particle thought to be essential to the process of particle decay His work on the Manhattan Project helped to usher in the nuclear age and confirmed his reputation as a brilliant physicist Why then would he disappear as he stood on the cusp of true greatness perhaps even the Nobel Prize In *Half Life* physicist and historian Frank Close offers a heretofore untold history of Pontecorvo's life based on unprecedented access to Pontecorvo's friends and family and the Russian scientists with whom he would later work Close takes a microscope to Pontecorvo's life combining a thorough biography of one of the most important scientists of the twentieth century with the drama of Cold War espionage With all the elements of a Cold War thriller classified atomic research an infamous double agent a possible kidnapping by Soviet operatives *Half Life* is a history of nuclear physics at perhaps its most powerful when it created the bomb

Italy's Jews from Emancipation to Fascism Shira Klein, 2018-01-18 How did Italy treat Jews during World War II Historians have shown beyond doubt that many Italians were complicit in the Holocaust yet Italy is still known as the Axis state that helped Jews Shira Klein uncovers how Italian Jews though victims of Italian persecution promoted the view that Fascist Italy was categorically good to them She shows how the Jews experience in the decades before World War II during which they became fervent Italian patriots while maintaining their distinctive Jewish culture led them later to bolster the myth of Italy's wartime innocence in the Fascist racial campaign Italy's Jews experienced a century of dramatic changes from emancipation in 1848 to the 1938 Racial Laws wartime refuge in America and Palestine and the rehabilitation of Holocaust survivors This cultural and social history draws on a wealth of unexplored sources including original interviews and unpublished memoirs

Destroyer of Worlds Frank Close, 2025-06-10 The thrilling and terrifying seventy year story of the physics that deciphered the atom and created the hydrogen bomb Although Henri Becquerel didn't know it at the time he changed history in 1896 when he left photographic plates and some uranium rocks in a drawer The rocks emitted something that exposed the plates it was the first documented evidence of spontaneous radioactivity So began one of the most exciting and consequential efforts humans have ever undertaken As Frank Close recounts in *Destroyer of*

World's scientists confronting Becquerel's discovery had three questions: What was this phenomenon? Could it be a source of unlimited power? And alas, could it be a weapon? Answering them was an epic journey of discovery with Ernest Rutherford, Enrico Fermi, Irene Joliot-Curie and many others jockeying to decipher the dance of particles in a decaying atom. And it was a terrifying journey as well as Edward Teller and others pressed on from creating atom bombs to hydrogen bombs so powerful that they could destroy all life on earth. The deep history of the nuclear age has never before been recounted so vividly. Centered on an extraordinary cast of characters, *Destroyer of Worlds* charts the course of nuclear physics from simple curiosity to potential Armageddon.

Swope of G.E.: The Story of Gerard Swope and General Electric in American Business David Loth, 2023-04-19. A sympathetic but objective biography. Swope the man was quite typical of the executives who managed great American business enterprises a generation or so after their establishment. He had the necessary talents: the total commitment to the job and company, the forceful drive, the passion for reliable data, the fondness for figures and the precise and analytical way of thought. He differed in that he was more aware of the needs of his employees and the role his enterprise played in the larger society. More like the present generation in this respect, he was still not an organization man. At G.E. no team fashioned policy; Swope alone made the decisions.

Alfred Chandler, *The Economic History Review*. A decidedly valuable and creditable book; the author very skillfully unfolds the basic facts of Swope's career; he adroitly and succinctly unfolds Swope's career against the background of the times. It is a tribute to Loth's ability and courage that he has succeeded in conveying so much information in so short a study, one of the best businessman biographies of the past decade.

George S. Gibb, *The Business History Review*.

The Wind and Beyond: Theodore von Kármán, Pioneer in Aviation and Pathfinder in Space Theodore von Kármán, Lee Edson, 2022-05-22. An autobiography that happily is an engrossing, full-bodied reflection of the man, a neatly balanced combination of technical insights and always pertinent, often irreverent anecdotes, an upbeat tale of a man who had a great love of life and a well-merited sense of achievement, told with genuine gusto and fascinating detail.

Richard Witkin, *The New York Times*. It is the triumph of this book that it manages to combine a chatty anecdotal and highly readable tale of a distinguished scientist's everyday life with a substantial number of penetrating insights into the creative process.

I. B. Holley Jr., *Science*. The present biography is eminently readable, sometimes puckish, and von Karman himself is rather inspiring in his faith in science.

Kirkus. Every paragraph grips the reader's attention; a book almost impossible to put down until it is read.

Aerospace Historian. This account of von Kármán's life and his contributions to the science of aerodynamics is most fascinating reading.

The Science Teacher. Every page of this superb classic is infused with von Karman's humanity. As his narrative makes clear, he was not simply a clever technician but a man of character whose vision advanced the aerospace sciences and fostered international cooperation.
