Advances In Cognitive Sociolinguistics Cognitive Linguistic Research:

Advances in Cognitive Sociolinguistics Dirk Geeraerts, Gitte Kristiansen, Yves Peirsman, 2010 Advances in Cognitive Sociolinguistics brings together ten studies into the social and conceptual aspects of language internal variation The volume covers three main areas where Cognitive Linguistics and sociolinguistics meet lexical and lexical semantic variation constructional variation and research on lexical attitudes and acquisition All ten contributions rely on a firm empirical basis in the form of advanced corpus based techniques and or experimental methods and survey based research They illustrate how Cognitive Sociolinguistics studies both the variation of meaning and the meaning of variation

Cognitive Sociolinguistics Revisited Gitte Kristiansen, Karlien Franco, Stefano De Pascale, Laura Rosseel, Weiwei Zhang, 2021-11-22 Cognitive Sociolinguistics draws on the rich theoretical framework of Cognitive Linguistics and focuses on the social factors that underlie the variability of meaning and conceptualization In the last decade the field has expanded in various way The current volume takes stock of current and emerging advances in the field in short academic contributions The studies collected in this book have a usage based approach to language variation and change drawing on the theoretical framework of Cognitive Linguistics and are sensitive to social variation be it cross linguistic or language internal Three types of contributions are collected in this book First it contains theoretical overview papers on the domains that have witnessed expansion in recent years Second it presents novel research ideas in proof of concept contributions aimed at blue sky research and out of the box linguistic analyses Third it showcases recent empirical studies within the field By combining these three types of contributions the book provides an encompassing overview of novel developments in the field of Cognitive Sociolinguistics

Constructions in Cognitive Contexts Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities
