BOOK JACKET **Recent Advances in Robot Kinematics** Jadran Lenarčič, Vincenzo Parenti Castelli, 2012-12-06 The articles of this book were reported and discussed at the fifth international symposium on Advances in Robot Kinematics As is known the first symposium of this series was organised in 1988 in Ljubljana The following meetings took place every other year in Austria Italy and Slovenia Linz Ferrara Ljubljana Portoroz Bernardin It must be emphasised that the symposia run under the patronage of the International Federation for the Theory of Machines and Mechanisms IFToMM In this period Advances in Robot Kinematics has been able to attract the most outstanding authors in the area and also to create an optimum combination of a scientific pragmatism and a friendly atmosphere Hence it has managed to survive in a strong competition of many international conferences and meetings In the most ancient way robot kinematics is regarded as an application of the kinematics of rigid bodies However there are topics and problems that are typical for robot kinematics that cannot easily be found in any other scientific field It is our belief that the initiative of Advances in Robot Kinematics has contributed to develop a remarkable scientific community The present book is of interest to researchers doctoral students and teachers engineers and mathematicians specialising in kinematics of robots and mechanisms mathematical modelling simulation design and control of robots

Advances in Robot Kinematics: Motion in Man and Machine Jadran Lenarčič, Michael M. Stanišić, 2010-07-20 The first International Meeting of Advances in Robot Kinematics ARK occurred in September 1988 by invitation to Ljubljana Slovenia of a group of 20 int

nationally recognized researchers representing six different countries from three continents There were 22 lectures and approximately 150 attendees This success of bringing together excellent research and the international community led to the formation of a Scientific Committee and the decision to repeat the event biannually The meeting was made open to all individuals with a critical peer review process of submitted papers The meetings have since been continuously supported by the Jozef Stefan Institute and since 1992 have come under patronage of the Inter

tional Federation for the Promotion of Mechanism and Machine Science IFToMM Springer published the first book of the series in 1991 and since 1994 Kluwer and Springer have published a book of the presented papers every two years The papers in this book present the latest topics and methods in the kinematics control and design of robotic manipulators They consider the full range of robotic systems including serial parallel and cable driven manipulators both planar and spatial The systems range from being less than fully mobile to kinematically redundant to overconstrained The meeting included recent advances in emerging areas such as the design and control of humanoids and humanoid subsystems the analysis modeling and simulation of human body motion the mobility analysis of protein molecules and the development of systems which integrate man and
